Welcome to Bunnings Special Orders

Bunnings has a huge range in stock, but did you know with the introduction of our Special Orders programme you can now choose from an EVEN BIGGER range – in fact many times the amount currently available in store. As well as the extensive range available in this brochure, we can order almost any product for you, as long as it's made by a company that we do business with.

Ordering is as simple as 1, 2, 3!

Make Your Choice

In selected aisles of your local Bunnings Warehouse, there are Special Orders brochures showing merchandise that is available. In some departments the brochures are on display at blue, freestanding booths or in Special Orders brochure holders. In other departments, there will be samples of these items displayed. If you don't see a Special Orders brochure, ask a Bunnings Team Member in the department to locate it for you. Look through the brochure until you find what you want.

Making a Purchase

After you have selected the product you want to order, fill out a Special Orders form (available at the Special Orders desk or in the brochure display booth) and take this to the Special Orders desk. A Special Orders Team Member will take your order and place this with the supplier of the product requested.

Payment: A 50% deposit is required when you place your order.

Full payment for all purchases must be made before you receive your order.

Product Arrival: You will be notified when the product is ready to be delivered, either to the store or to your home, which will usually occur within 7-14 working days, depending on the product purchased. Customised orders may be subject to longer delivery times.

Delivery: Although most Special Order products shown in this brochure are delivered free to the store, some may incur a delivery fee. Home delivery can be arranged with the store at an additional cost. Please consult the Special Orders team for more details.

Receiving Your Goods

When your Special Order is ready for delivery or collection, you will be contacted by telephone by Bunnings.

Special Orders are ordered according to the customer's specifications. Because Special Orders are not stocked lines, if a product is returned or the order cancelled, a 20% restocking charge may apply to return the goods to the supplier. Custom-made items cannot be returned.

Valid until the end of December 2010.

Promax Tank Package

SKU00384452

The Garden package is a kit which includes the Rivaflo 45Lpm pump, connection fittings and stylish pump cover.

The Rivaflo GPP40 is a self priming pump that automatically switches on as soon as you turn on your garden taps. Ideal for pumping rainwater from your tank to the garden, washing cars, sprinklers and small irrigation schemes.

Package Includes:

- Pump, Connection Kit and Pump cover.
- Rivaflo 45Lpm pump and controller.
- Connection kit connects tank to pump and includes: 25mm ball valve, connection hose and connection fittings.
- 1 Year warranty.

Submersible Pump

SKU00384397

The submersible pump is placed in the tank; minimising noise and keeping it out of sight and away from the elements. The energy saving pump only operates when rainwater is being used, ensuring a seamless and uninterrupted flow of water. This quality pump comes with a 2 year warranty.

Water Switch Pump Package Device

SKU00384305

A state of the art, automatic switching device that supplies appliances in the home such as toilets and washing machines. This package utilises rainwater as its first source, resulting in substantial and sustainable water savings, which in turn means saving on water bills.

Water Switch selects rainwater from the tank when available, but returns to mains water instantaneously if the tank is empty; reverting back to the tank when rainwater is present.

Features:

- In-built backflow prevention; dual check valve keeps mains water and rain water separated.
- Compliant with latest watermark approval laws.

Pump Covers

Large SKU00383720

Small SKU00383647

To compliment your Rainwater Tank.

- Well vented.
- S/S screws provided.
- Fits most pumps.
- Easy to install.
- Available in all Promax Tank range colours.

This versatile, low cost shelter is ideal for protecting your pumps.

Ordering is as simple as:

1

Make your choice from the Special Order displays or brochures.

2

Fill in the order form and take it to the Special Orders desk.

3

Your Special Order will be delivered to your home or store.

Bladda Tanks

The Bladda Tank is a flexible water tank designed to fit the sub-floor area of your home or decking, allowing you to store large amounts of rainwater without taking up valuable space in the backyard.

Collecting rainwater from most of the roofed area (rather than just one or two downpipes as used by a traditional rain tank) makes the Bladda Tank a more effective means of capturing and storing water.

The Bladda Tank can be rolled up so it can pass through a restricted opening before unrolling to full size. This allows a large rain water tank to be installed under a house even if there is only a small opening.

If you're wondering how much water you will need with a Bladda Tank, rest assured that you can add to your Bladda Tank once it's installed and increase your water storage as required.

From a simple residential garden to a rural property, Bladda Tank is a water storage solution designed to fit your watering needs.

Minimise the impact on your outdoor area with a Bladda Tank that can hide away under a house or deck.

Now you can choose from an even bigger range

Features:

- Easy installation in locations with limited access.
- 10 Year warranty.
- UV stabilized; resistant to hardening or cracking (tested 10 years).
- Reinforced polypropylene for added strength (no frames required).
- Overflow to storm water.
- Easily connected to existing garden systems.
- Portable for easy relocation.
- Boxed for easy transport – weighs from as little as 16kg.
- Can store drinkable water*.

*Installation of water filters is recommended.

Size:

- Tanks can be multi-linked for increased water capacity
- Four sizes available: 2550, 3100, 5200 & 6000 litres.
- Custom made and rural sizes available.

It is recommended that your Bladda Tank be installed by a qualified plumber.

BAILEY TANKS® Bailey Tanks

You can trust a Bailey Water Tank with your most precious resource.

Bailey Tanks have been making specialist liquid storage tanks for over 36 years. Whether it's a 400 gallon garden tank, a 5,500 gallon farm storage tank or an urban Slimline tank; Bailey Tanks have the storage tank to fit your requirements.

Tank Features:

- Free from leaching or osmosis and inhibits algae growth.
- No reconstituted or previously used materials are utilised; preventing any exposure to chemical residue.
- Won't rot, rust, crack or fade.
- Moulded in one piece, meaning there are no joints or weak spots where leaks could occur.
- U.V. stabilised for protection against the sun.
- Made to high manufacturing standards to meet your expectations.
- Comes with a quality and performance warranty.

Stormwater Retention Tanks

Underground Retention/Detention of Stormwater.

Stormwater Retention Tanks are used in subdivisions, household lots and commercial applications.

The E1 Stormwater system is a modular underground retention tank fully tested and designed to withstand ground and water pressure at depth. The E1 is engineered by geotechnical experts, including Finite Element Analysis (FEA).

The E1 Tank is a very simple tank to work with its large manholes with tamper proof lids, multiple areas for stormwater inlet/outlet and an allowance for easy linking to other tanks or systems combine to make the E1 Stormwater system your ideal choice.

Underground Retention Tank 3600

SKU00384118

Tank Features:

- Multiple inlet/outlet panels.
- Threaded fittings available.
- Rubber uni-seals for plumbing tank to stormwater available.
- Capacity: 1,800 - 30,000L.
- Custom made to suit customer plans or site.

Delivery Charges

Although most Special Order products shown in this brochure are delivered free to the store, some may incur a delivery fee. Home delivery can be arranged with the store at an additional cost. Please consult the Special Orders team for more details.

Refunds, Exchanges and Returns

If your goods are incorrect or damaged on delivery we will exchange the product or issue a full refund. If you are unhappy for any other reason with your order, or change your mind, and notify us within 7 working days of delivery with your original receipt we will exchange or refund any unused items*. You may incur a 20% restocking fee for items that are not faulty or damaged.

Please ensure that these goods are returned to us, as sold, with the original sales receipt. Custom made items cannot be returned.

*Excludes installations and products made to measure.

Product Availability

Whilst we make every effort to maintain our supply, we cannot guarantee availability. Please check in store for the latest information. Delivery will usually be made within 7–14 working days. Whilst we make every effort to maintain our service levels, in exceptional circumstances our delivery lead times may be extended. You will be advised of any changes to the published timings at the time of placing your order.

Price Guarantee

If you happen to find a cheaper price on the same stocked item, we will not only match it, but beat it by 15%*.

*Excludes trade quotations, stock liquidations and commercial quantities. Shelf prices may be lower than advertised to ensure the lowest prices every day.

All dimensions are approximate. All specifications correct at the time of going to print. Please note that the photographic and printing process may distort some of the colours. All items are available at the time of going to print. Not all services and products featured are available in all stores, but may be ordered. See in store for product availability. Shelf prices may be lower than advertised to ensure lowest prices every day. We reserve the right to restrict the purchase of commercial quantities. Bunnings Ltd. Valid until the end of December 2010.

Before ordering have you?

- Checked your chosen colours with a Bunnings team Member as colours shown are indicative only.
- Ordered any accessories that you require with your tank.
- Checked for any standard or site specific requirements with your local council.

Did you know?

- Installing a rainwater tank is one of the most effective ways to reduce your water bills and save money.
- Collecting rainwater allows you to save water for re-use in the home and garden during dry times.
- Your rainwater tank can be connected to the house and used for toilet flushing and laundry use.
- Rainwater is also suitable for use in pools and for washing cars.
- For more ideas on saving water in your home and garden please visit our online Sustainability Home at www.bunnings.co.nz
