

Create your own modern, customised floating shelves using the Carinya floating shelf brackets.

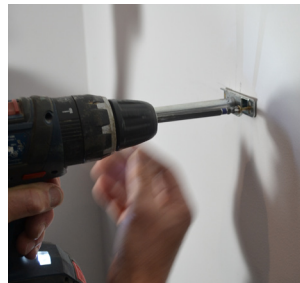

1 Preparing Shelf.

Using a 22mm spade drill bit carve out rebates of 76x20mm and drill 12mm holes at right angles for each bracket to sit in.

2 Secure floating brackets to wall.

Using panhead screws 5.5x50mm secure brackets to wall. Note: one fastener should be screwed into the wall stud, second fastener use hollow wall anchors or masonry anchors if installing into brick or concrete.

3 Installing Shelf.

Slide pre-drilled/rebated shelf into wall mounted floating brackets. If required use bracket alignment screws to adjust the level of the shelf.

Handy Hints

- Maximum shelf dimensions for 2 brackets 1000 x 300mm with minimum thickness of 24mm
- Load capacity on shelf is 9kg per pair of brackets
- For larger shelf sizes use more than 2 floating brackets
