

Wiha Volt Detector.

Testing pen for AC voltages.

The testing pen detects the phase and neutral conductor

Press down the clip, and the battery compartment locking mechanism opens

CE

Wiha Volt Detector.

The Wiha Volt Detector is a measuring device to test the presence of AC voltage safely. For this purpose, the white tip is guided to the wire or contact to be tested. If the sensor detects AC voltage within a field of 4 mm, the red LED lights up immediately.

A particular advantage is that this test can be performed without having to disconnect or open cables, mains sockets, fuses, circuit breakers, junction boxes, etc.

A current flow through the user's body is not necessary for the reliable use of the testing pen. The power for operating the red LED is provided by 2 AAA batteries (LR03) that are included in the delivery

- Testing pen detects AC voltages from 230 to 1,000 V AC
- A bright red LED indicates AC voltages
- A current flow through the user's body is not necessary
- Complies with IEC 61010-1 safety standard: Measuring category CAT III 1,000 V
- CE compliant.

Volt Detector.

NEW

CE

255-12

Volt Detector: Non-contact measuring voltage tester for AC voltages from 230 to 1,000 VAC.

- Scale: Bright red LED.
 Handle: Handy plastic housing with removable cap. Practical clip.
 Torque transducer: Protected under the white tip, the sensor provides non-contact recognition of AC voltages within a field of 4 mm.
 Standards: IEC 61010-1
 Measuring category: CAT III 1,000 VAC.
 Application: For determining AC voltages in the low voltage range between 230 and 1,000 VAC.
 Extra: 2 AAA batteries (LR03) are inserted in the voltage tester.
