To slide a corner post onto a sheet, align the lugs with the grooves inside the post as illustrated to the right.

Begin the top layer by overlapping a matching sheet by 2x SNAPTITE Lugs, with the top sheet inside the bottom sheet.

Holding both sheets together where they overlap, gently but firmly push the assembly down into the posts.

Leave 2x SNAPTITE Lugs sticking out from the top of the posts.

Repeat this for the remaining 3x posts and another 3x sheets to create the bottom layer by;
A) installing posts on both ends of 2x sheets, and then sliding the remaining sheets in between those 2x assemblies, or
B) working your way around the assembly clockwise or anticlockwise

Apply all of the caps onto the posts & press down on them firmly to secure.

No tools. No screws.
