ARGUABLY AUSTRALIA'S BEST SEPTIC TANK

Check out details online

EASY TO HANDLE

BL00 Septic Tanks are a one piece moulded tank, and lifting lugs are incorporated into the design to make it easy to sling the tanks using crane, excavator or other lifting machinery.

AUSTRALIAN MADE

BL00 Septic Tanks are fully designed and manufactured in Australia, using only high quality Australian sourced materials. Build your reputation by using Australian made products.

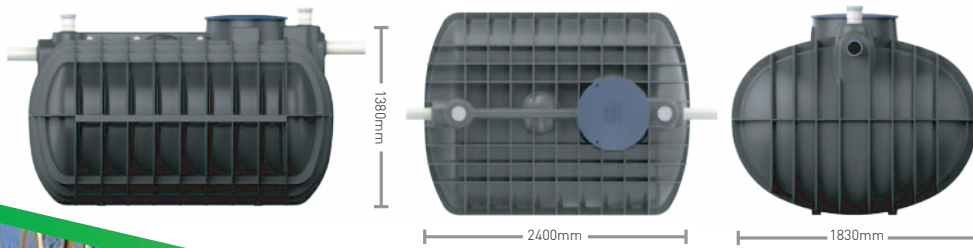

ENGINEERED DESIGN

The ribbed design of the BL00 Septic Tank provides incredible strength and resistance to shape deformation. Extensive work and physical testing has ensured that BL00 Septic Tanks will be good indefinitely.

LOW, COMPACT DESIGN

BL00 Septic Tanks are designed to minimise the amount of digging required prior to installation. By utilising a low profile design, the depth of excavation is minimised, and the hole is easier to backfill after installation.

SPECIFICATIONS

- ✓ 3250L SEPTIC CAPACITY
- ✓ TESTED TO AS/NZS1546.1:2008
- ✓ LIFTING LUGS TO FACILITATE PLACEMENT
- ✓ LARGE INSPECTION OPENING

EASY COMPLIANCE

BL00 Septic Tanks are manufactured and tested in accordance with Australian Standard AS/NZS1546.1:2008.

FULLY PRE-ASSEMBLED

BL00 Septic Tanks are pre-assembled before leaving the factory, to minimise the amount of work required on site. Simply position the tank and connect in and out flow pipes!

EXTREMELY ROBUST

Manufactured from high quality industrial grade polyethylene, BL00 Septic Tanks are able to withstand the rigours of the real world. Knocks in transport, jolts and bangs during installation, ground and water pressure after installation.....made tough to make it easy.
