IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: included accessories.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
- Professional, industrial or high frequency use.
1. Charging Input
2. Battery Charge LED’s
3. Variable Speed Controls
4. On/Off Button
5. Spindle Lock Button
6. Shaft Collar
7. Collet Nut

1. Press and hold the spindle lock button.
2. Using the supplied wrench, slightly loosen the collet nut.
3. Insert shaft of accessory into the collet.
4. Tighten collet nut using spindle lock and wrench.

WARNING! ENSURE THE TOOL IS SWITCHED OFF BEFORE PERFORMING ANY OF THE FOLLOWING OPERATIONS.
2. **SHARPENING GUIDE**

Before fitting one of the sharpening attachments, you must attach the desired accessory and secure by tightening the collet nut.

**Fitting Chainsaw Sharpening Guide**

1. Select the diamond sharpening wheel that is slightly smaller than the gap in the chainsaw blade.

2. Remove shaft collar by rotating anti-clockwise.

3. Fit the chainsaw sharpening guide by rotating it clockwise.

**Fitting Blade Sharpening Guide**

1. Remove shaft collar by rotating anti-clockwise.

2. Fit the blade sharpening guide by rotating it clockwise.

3. Adjusting Attachments**

Before using the chainsaw sharpening guide, the adjustable height must be repositioned to correctly contact the sharpening edge.

**Chainsaw Sharpening Guide**

1. Using the wrench, loosen the adjustable height screw on the chainsaw sharpening guide.

2. Place the wrench across the top of the chainsaw sharpening guide, aligning the sharpening wheel with the matching sized guide on the wrench.

3. Adjust the height of the guide so that the sharpening wheel rests against the guide on the wrench.

4. Tighten the adjustable height screw to secure in the correct position.
5. CONTROLS

On/Off Button
1. To turn on, push the on/off button. The LED’s will illuminate once switched on.
2. To turn off, push the on/off button again.

Variable Speed Control
Note: The default speed setting when switched ON is “3”. Press the speed control to a position between “1” and “6” as follows.
1. Press the “+” button to increase the speed.
2. Press the “-” button to reduce the speed.

4. BATTERY & CHARGER

WARNING: THE POWER SUPPLY FOR THIS CHARGER IS RECOMMENDED FOR USE WITH A RESIDUAL CURRENT DEVICE (RATED AT 30mA OR LESS).

Note: Once connected to power the battery charge indicator red LED will illuminate while charging. The green LED illuminates when fully charged.

Charging Using the AC Adaptor
1. Plug one end of the USB cable into the AC Adaptor and connect the adaptor into mains power outlet.
2. Plug the other end of the USB cable directly into the charging input.

Charging Using a USB Outlet
1. Plug the USB cable directly into the charging input.
2. Charge via USB cable to a USB outlet.

Battery Charge Indicator
The portable chainsaw sharpener is equipped with a battery charge indicator to show the state of the battery charge. Press the on/off button and look to see which LED lights.

- Full state of charge.
- Mid state of charge.
- Low state of charge, requires charging soon.
- Battery requires immediate charging.

Note: The charger needs to be removed from the tool to check the state of charge.
6. SHARPENING CHAINSAW CHAIN

1. Ensure that the chainsaw sharpening guide and the correct sized sharpening bit is fitted securely.

3. Align the portable chainsaw sharpener accessory with the gap in the first chainsaw tooth. Adjust the angle of the sharpener to match the angle of the cutting edge on the tooth.

4. Start with the tool away from the surface of the chainsaw chain and then switch the tool on.

5. Slide the tool in and out against the cutting edge of the chain tooth.

6. Rotate the chain and repeat steps 3-5 for all chainsaw teeth until you get back to the starting tooth that was marked.

7. SHARPENING BLADES

The blade sharpening guide can be used to sharpen a range of blades such as mower blades and garden shears.

1. Ensure that the blade sharpening guide and the grinding stone is fitted securely.

2. Secure the blade with a clamp and switch the tool on.

3. Rest the angled surface of the blade sharpening guide against the under side of the blade.

4. Carefully lower the grinding stone onto the blade and slide along the entire edge of the blade.

Note: To sharpen the blade, only a few passes are necessary.

Note: Make sure to complete the same number of passes on each tooth to remove a consistent amount of material when sharpening.

30-35°

Note: The most common chain angles are between 30-35°.

Note: A speed selection of 4 or 5 is recommended for sharpening a chainsaw chain.

Note: A speed selection of 4 or 5 is recommended for sharpening a blade.

**MAINTENANCE**

- Keep the ventilation vents of the rotary tool clean at all times, if possible, prevent foreign matter from entering the vents.
- After each use, blow air through the rotary tool housing to ensure it is free from all dust particles which may build up. Build up of dust particles may cause the rotary tool to overheat and fail.
- If the enclosure of the rotary tool requires cleaning, do not use solvents but a moist soft cloth only. Never let any liquid get inside the rotary tool; never immerse any part of the rotary tool into a liquid.
- If the replacement of the supply cord is necessary, this has to be done by the manufacturer or his agent in order to avoid a safety hazard.

**CARING FOR THE ENVIRONMENT**

- Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.
- Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

**SPARE PARTS**

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse.

For further information, or any parts not listed here, visit www.ozito.com.au or contact Ozito Customer Service:

- Australia 1800 069 486
- New Zealand 0508 069 486

E-mail: enquiries@ozito.com.au

**ELECTRICAL SAFETY**

- **WARNING!** When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage.

**TROUBLESHOOTING**

Sparking visible through the housing air vents

A small amount of sparking may be visible through the housing vents. This is normal and does not indicate a problem.

The tool loses power during use

- Battery could be low and requires charging.
- The tool could have overloaded due to excessive pressure. Turn the product back on and reduce load.

**BATTERY AND CHARGER SAFETY WARNINGS**

This manual contains important safety and operating instructions for your battery charger:

1. Before using the charger read all instructions and cautionary markings on the charger, battery pack and the product using the battery pack.
2. This charger is not intended for any uses other than charging rechargeable batteries. Any other use may result in risk of fire, electric shock or electrocution.
3. Do not place any object on top of the charger or place the charger on a soft surface that may result in excessive internal heat. Place the charger in a position away from any heat source.
4. To reduce risk of damage to the electric plug and cord, pull by the plug rather than the cord when disconnecting the charger.
5. Make sure the cord is located so that it will not be stepped on, tripped over, or otherwise subjected to damage or stress.
6. An extension cord should not be used unless absolutely necessary. Use of an improper extension cord could result in the risk of fire, electric shock or electrocution.
7. Do not operate the charger if it has received a sharp blow, been dropped or otherwise damaged in any way. Have it checked by an electrician or power tool repairer.
8. Do not disassemble charger. Take it to an electrician or power tool repairer when service or repair is required. Incorrect reassembly may result in a risk of electric shock, electrocution or fire.
9. To reduce risk of electric shock, unplug the charger from the outlet before attempting any cleaning. Removing the battery pack will not reduce this risk.
10. Never attempt to connect 2 chargers together.
11. Do NOT store or use the tool and battery pack in locations where the temperature may reach or exceed 40ºC (such as inside sheds or metal buildings in summer).
12. The charger is designed to operate on standard household electrical power (240 volts). Do not attempt to use it on any other voltage!
13. The battery pack is not fully charged out of the carton. First read the safety instructions and then follow the charging notes and procedures.
14. The longest life and best performance can be obtained if the battery pack is charged when the air temperature is between 18 - 24ºC. Do not charge the battery pack in an air temperature below 10ºC or above 40ºC. This is important and will prevent damage to the battery pack.
15. Do not incinerate the battery pack even if it is seriously damaged or is completely worn out. The battery can explode in a fire.
16. Never attempt to open the battery pack for any reason. If the plastic housing of the battery pack breaks or cracks, immediately discontinue use and do not recharge.
17. During charging, the battery must be placed in a well ventilated area.
GENERAL POWER TOOL SAFETY WARNINGS - PERSONAL SAFETY

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions listed below may result in electrocution, fire, personal injury and/or serious injury. Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety
   a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
   b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. Electrical safety
   a. Power tool plugs must match the outlet. Never use an adapter plug with a grounded (grounded) power tool. Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Follow to follow all instructions. Accessories running faster than their rated speed can break and flay apart.
   b. Do not use accessories which are not specifically designed and recommended by the tool manufacturer. Just because the accessory can be attached to your power tool, it does not assure safe operation.
   c. The rated speed of the accessory must be at least equal to the maximum speed marked on the power tool. Accessories running faster than their rated speed can break and flay apart. Large workpieces tend to sag under their own weight. Supports must be placed under the workpiece near the plane of the rotating accessory and the power tool at maximum no-load speed for one minute. Damaged accessories will normally break apart during this test time.
   d. Wear personal protective equipment. Depending on application, use face shield, safety goggles or safety glasses. As appropriate, wear dust mask, hearing protectors, gloves and workshop apron to prevent unnecessary exposure to filtering particles generated by your operation. Prolonged exposure to high intensity noise may cause hearing loss.
   e. The outside diameter and the thickness of your accessory must be within the capacity rating of your power tool. Incorrectly sized accessories cannot be adequately guarded or controlled.
   f. When mounting accessory, check the grain direction of the grinding spindle thread. For accessories mounted by flanges, the arbor hole of the accessory must fit the locating diameter of the flange. Accessories do not do not run true if the workpiece will tend to walk off balance, jar, break or propel the tool in a direction opposite to the wheel's movement. The correct power tool speed will depend on the diameter of the wheel in the cut and the possibility of kickback or wheel breakage.
   g. If operating a power tool in a damp location, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.
   h. Have your power tool serviced by a qualified repair person using only identical replacement parts. Such preventive safety measures reduce the risk of starting the power tool accidentally.
   i. Do not position your body in line with and behind the rotating wheel. When the wheel, at the point of operation, is moving away from your body, the possible kickback may propel the spinning wheel and the power tool motionless until the wheel comes to a complete stop. Never attempt to remove the cut-off wheel from the cut while the wheel is in motion otherwise kickback may occur. Investigate and take corrective action to eliminate the cause of wheel binding.
   j. Do not restart the cutting operation in the workpiece. Let the wheel reach full speed and carefully remove the tool from the workpiece and the possibility of kickback or wheel breakage.
   k. Do not use accessories that require liquid coolants. Using water or other liquid coolants may result in increased risk of electric shock.
   l. Do not attach a saw chain woodcarving blade or toothed saw blade.
   m. Do not use accessories that require liquid coolants. Using water or other liquid coolants may result in increased risk of electric shock.
