

# Fold Down Clotheslines

## Daytek Fold Down Range

Fold Down Clotheslines offer flexibility in a range of sizes and fold away when not in use. Single and Twin models are an excellent medium space option offering 24 metres of line space. Slim and Mini models use minimal room and at only 560mm deep in the up position are ideal in narrow spaces.

All Daytek Fold Down clotheslines use a single frame design with a one piece front bar for superior strength. Manufactured from high tensile galvanised steel tube and powder coated in a range of colours there is a Daytek Fold Down Clothesline that will meet your needs. Fold Down clotheslines can be mounted either on a wall or using the Daytek Ground Mount Kit.

Daytek Fold Down Clotheslines are supported with a 10 year structural warranty and a 2 year line warranty and are backed with a full range of spare parts.

We offer a custom build service through the Special Orders Desk where we will build a Fold Down clothesline to the customers required dimensions.

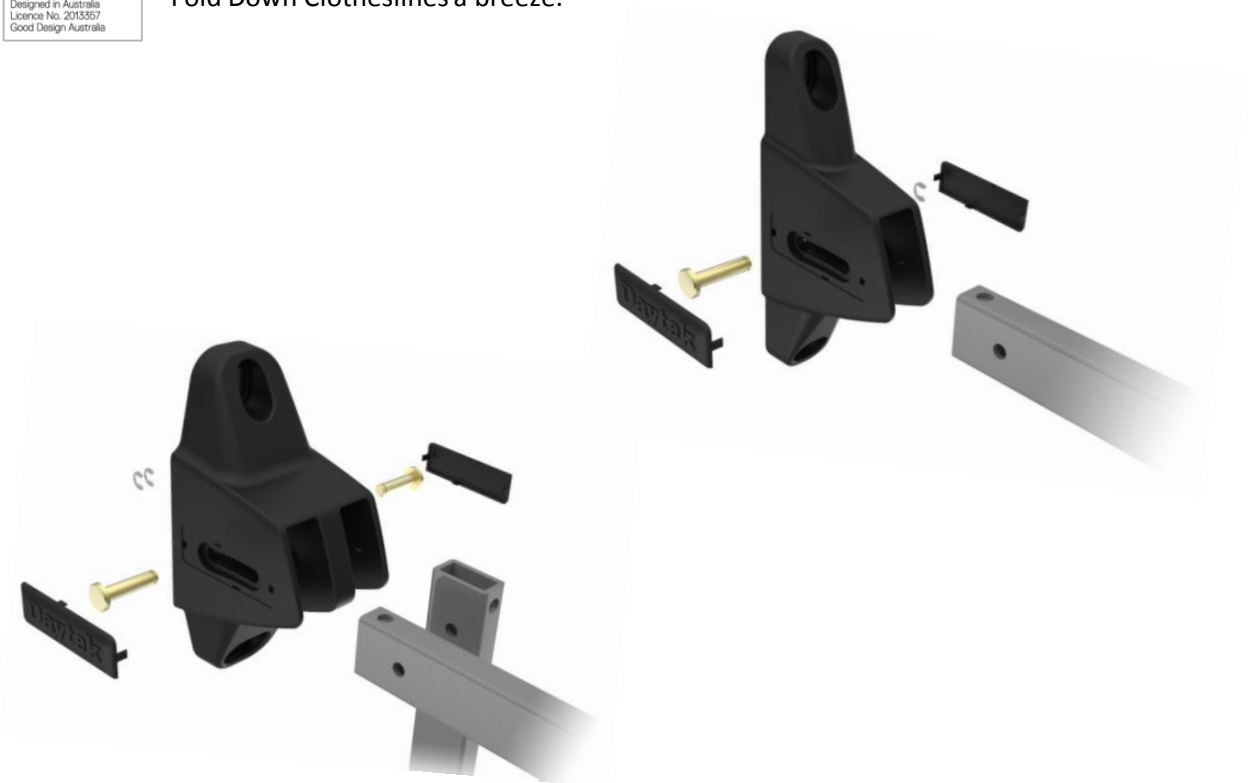

Quick Selection Guide	Width mm	Depth mm	No. of Lines	Line Space
Single 	2,240	1,000	11	24m
Twin 	2,240	1,000	11	24m
Slim 	2,240	560	6	13m
Mini 	1,540	560	6	9m

## Daytek Fold Down Range

In 2013 the Daytek Fold Down clothesline range received a Good Design Award from the Australian Design Council. Featuring a glass fibre reinforced nylon wall bracket across all four models the unique lift and lock system makes operation of the Daytek Fold Down Clotheslines a breeze.

The Daytek Lift and Lock Fold Down bracket is easier, quicker and safer to operate. Manufactured from UV stabilised glass fibre reinforced nylon the Lift and Lock bracket is able to support loads up to 75kg making it stronger and more durable than traditional steel bracket designs.

The unique design of the Lift and Lock bracket features a locating tab that when engaged securely locks the side arms in the up position and prevents the clothesline from collapsing accidentally. The ingenious lift up and slide in; lift up slide out mechanism makes the clothesline extremely easy to operate and because there are no cumbersome support arms the risk of objects becoming caught or jammed is eliminated.
