

**SAFETY DATA SHEET** 

Damp Rid Moisture Absorbers

## Section 1. Identification

| Product identifier   | : Damp Rid Moisture Absorbers   |
|--|---|
| Product code   | : FG01, FG30, FG37, FG83HLVAZ, FG80, FG100, FG91, FG88, FG118   |
| Other means of<br>identification                           | : Not available.  |
| Product type   | : Solid.  |
| Relevant identified uses                                   | of the substance or mixture and uses advised against  |
| Product use  | : Moisture remover  |
| Area of application  | : Consumer applications.  |
| Supplier/Manufacturer                                      | : Kendler Corporation Pty. Ltd.<br>5 Korinya Road<br>Castle Cove, NSW 2069, Australia<br>Telephone no.:+1-800-641-830<br>Web Site: www.kendler.com.au |
| Emergency telephone<br>number (with hours of<br>operation) | : Poisons Information Centre 13 11 26   |

# Section 2. Hazard(s) identification

| Classification of the substance or mixture | : H302 ACUTE TOXICITY (oral) - Category 4<br>H319 SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2A   |
|--|---|
| GHS label elements                         |   |
| Hazard pictograms                          |   |
| Signal word                                | : WARNING   |
| -  |   |
| Hazard statements                          | : H302 - Harmful if swallowed.<br>H319 - Causes serious eye irritation.   |
| Precautionary statements                   |   |
| Prevention                                 | : Do not ingest. Do not eat, drink or smoke when using this product. Avoid contact with eyes. Wash thoroughly after handling.   |
| Response                                   | <ul> <li>P301 + P312 + P330 - IF SWALLOWED: Call a POISON CENTER or physician if<br/>you feel unwell. Rinse mouth.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical attention.</li> </ul> |
| Storage                                    | : Not applicable.   |
| Disposal                                   | <ul> <li>P501 - Dispose of contents and container in accordance with all local, regional,<br/>national and international regulations.</li> </ul>  |
| Supplemental label elements                | : Not applicable.   |

## Section 2. Hazard(s) identification

Other hazards which do not : None known. result in classification

## Section 3. Composition and ingredient information

Substance/mixture Other means of identification : Mixture

: Not available.

| Ingredient name  | % (w/w) | CAS number |
|------------------|---------|------------|
| calcium chloride | ≥90     | 10043-52-4 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necessary first a | aid measures  |
|----------------------------------|---|
| Eye contact                      | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |
| Inhalation                       | Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband.  |
| Skin contact                     | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion                        | Wash out mouth with water. Remove dentures if any. Remove victim to fresh air<br>and keep at rest in a position comfortable for breathing. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention. If necessary, call a poison center or physician. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband. |
| Most important symptoms/effe     | cts, acute and delayed  |
| Potential acute health effects   |   |
|                                  |   |

| Date of issue/Date of revision | : 05/12/2016                                      | Date of previous issue           | : No previous validation | Version | :1 | 2/10 |
|--------------------------------|---|----------------------------------|--------------------------|---------|----|------|
| Eye contact                    | : Adverse s<br>pain or irr<br>watering<br>redness | symptoms may include the itation | following:               |         |    |      |
| <u>Over-exposure signs/syr</u> | <u>nptoms</u>                                     |                                  |                          |         |    |      |
| Ingestion                      | : Harmful i                                       | f swallowed.                     |                          |         |    |      |
| Skin contact                   | : No knowr  | n significant effects or critic  | al hazards.              |         |    |      |
| Inhalation                     | : No knowr  | n significant effects or critic  | al hazards.              |         |    |      |
| Eye contact                    | : Causes s  | erious eye irritation.           |                          |         |    |      |

## Section 4. First aid measures

| Inhalation   | : No specific data. |
|--------------|---------------------|
| Skin contact | : No specific data. |
| Ingestion    | : No specific data. |

### Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>                          |
|----------------------------|--|
| Specific treatments        | : No specific treatment.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

#### See toxicological information (Section 11)

## Section 5. Firefighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : No specific fire or explosion hazard.   |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul> |

### Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Provide adequate ventilation.<br>Wear appropriate respirator when ventilation is inadequate. Put on appropriate<br>personal protective equipment. |
|--------------------------------|---|---|
| For emergency responders       | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |

### Methods and material for containment and cleaning up

| Date of issue/Date of revision | : 05/12/2016 | Date of previous issue | : No previous validation | Version : 1 | 3/10 |
|--------------------------------|--------------|------------------------|--------------------------|-------------|------|
|--------------------------------|--------------|------------------------|--------------------------|-------------|------|

## Section 6. Accidental release measures

| Small spill | Move containers from spill area. Avoid dust generation. Do not dry sweep. Place<br>spilled material in a designated, labeled waste container. Vacuum dust with<br>equipment fitted with a HEPA filter and place in a closed, labeled waste container.<br>Dispose of via a licensed waste disposal contractor.   |
|-------------|---|
| Large spill | : Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |
|             |   |

## Section 7. Handling and storage

| Precautions for safe handling                                      |   |   |
|--|---|---|
| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Do not ingest.<br>Avoid contact with eyes, skin and clothing. Keep in the original container or an<br>approved alternative made from a compatible material, kept tightly closed when not<br>in use. Empty containers retain product residue and can be hazardous. Do not<br>reuse container. Avoid breathing dust.  |
| Advice on general<br>occupational hygiene                          | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. |

# Section 8. Exposure controls and personal protection

| Occupational exposure limits       | 5                                   |   |   |  |       |
|------------------------------------|-------------------------------------|---|---|--|-------|
| None.                              |                                     |   |   |  |       |
| Appropriate engineering controls   | •                                   | al ventilation requirements.<br>orker exposure to airborne o  | 5   | should be sufficien                    | ıt to |
| Environmental exposure controls    | they com<br>cases, fu               | s from ventilation or work pr<br>ply with the requirements of<br>me scrubbers, filters or engi<br>t will be necessary to reduc                            | environmental protection ineering modifications to t                                  | legislation. In som                    |       |
| Individual protection measure      | <u>s</u>                            |   |   |  |       |

| Eye/face protection                | assessme<br>gases or                | ewear complying with an ap<br>ent indicates this is necessa<br>dusts. If contact is possible<br>e assessment indicates a hi                               | ary to avoid exposure to lic<br>, the following protection                            | quid splashes, mist<br>should be worn, | ts,   |
| Date of issue/Date of revision : 0 | 5/12/2016                           | Date of previous issue  | : No previous validation  | Version : 1                            | 4/10  |

**Control parameters** 

# Section 8. Exposure controls and personal protection

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|------------------------|---|
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

## Section 9. Physical and chemical properties

| Appearance                                   |   |                             |
|--|---|-----------------------------|
| Physical state                               | 1 | Solid. [Pellets. / Flakes.] |
| Colour                                       | 1 | White.                      |
| Odour  | 1 | Odourless.                  |
| Odour threshold                              | : | Not available.              |
| рН   | : | Not available.              |
| Melting point                                | : | 187.8°C (370°F)             |
| Boiling point                                | 1 | Not available.              |
| Flash point                                  | 1 | Not available.              |
| Evaporation rate                             | 1 | Not available.              |
| Flammability (solid, gas)                    | 1 | Not available.              |
| Lower and upper explosive (flammable) limits | : | Not available.              |
| Vapour pressure                              | : | Not available.              |
| Vapour density                               | 1 | Not available.              |
| Relative density                             | 1 | 2.15 at 25°C                |
| Solubility                                   | 1 | 40% water at 25°C           |
| Partition coefficient: n-<br>octanol/water   | : | Not available.              |
| Auto-ignition temperature                    | 1 | Not available.              |
| Decomposition temperature                    | : | Not available.              |
| Viscosity                                    | 1 | Not available.              |
| Flow time (ISO 2431)                         | : | Not available.              |
|  |   |                             |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.<br>Under normal conditions of storage and use, hazardous polymerisation will not occur. |
| Conditions to avoid                | : Hygroscopic. Keep container tightly closed.<br>Keep away from heat.   |
| Incompatible materials             | : Reactive or incompatible with the following materials: oxidizing materials and moisture.  |
| Hazardous decomposition            | : Under normal conditions of storage and use, hazardous decomposition products  |

products should not be produced.

# Section 11. Toxicological information

### Information on toxicological effects

| Ingestion                                | :          | No specific data.  |
|  | <u>ts</u>  | as well as chronic effects from short and long-term exposure                             |
| Short term exposure                      |            |  |
| Potential immediate<br>effects           | :          | Not available.   |
| Potential delayed effects                | 1          | Not available.   |
| <u>Long term exposure</u>                |            |  |
| Potential immediate<br>effects           | :          | Not available.   |
| Potential delayed effects                | :          | Not available.   |
| Potential chronic health effe            | <u>əct</u> | <u>S</u>   |
| Not available.                           |            |  |
| <b>Conclusion/Summary</b>                | :          | Contains material that may cause target organ damage, based on animal data.              |
| General                                  | :          | No known significant effects or critical hazards.  |
| Carcinogenicity                          | :          | No known significant effects or critical hazards.  |
| Mutagenicity                             | :          | No known significant effects or critical hazards.  |
| Teratogenicity                           | :          | No known significant effects or critical hazards.  |
| <b>Developmental effects</b>             | :          | No known significant effects or critical hazards.  |
|  |            |  |

#### **Numerical measures of toxicity**

#### Acute toxicity estimates

**Fertility effects** 

| Route | ATE value  |
|-------|------------|
| Oral  | 1159 mg/kg |

: No known significant effects or critical hazards.

## Section 12. Ecological information

#### **Toxicity**

**Conclusion/Summary** 

: May cause long-term adverse effects in the aquatic environment.

| Persistence and degradabili<br>Conclusion/Summary             | ty<br>: Not available. |  |

| Bioaccumulative potential<br>Not available.                   |                        |  |
| Mobility in soil<br>Soil/water partition<br>coefficient (Koc) | : Not available.       |  |

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

Transport in bulk according : Not available. to Annex II of Marpol and the IBC Code

# Section 15. Regulatory information

Standard Uniform Schedule of Medicine and Poisons

Not regulated.

Model Work Health and Safety Regulations - Scheduled Substances

No listed substance

Australia inventory (AICS) : All components are listed or exempted.

### International regulations

<u>Chemical Weapon Convention List Schedules I, II & III Chemicals</u> Not listed.

Montreal Protocol (Annexes A, B, C, E)

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Rotterdam Convention on Prior Informed Consent (PIC)

Not listed.

### **UNECE Aarhus Protocol on POPs and Heavy Metals**

Not listed.
