1. IDENTIFICATION: PRODUCT IDENTIFIER AND CHEMICAL IDENTITY

Product Name: DISPOSABLE ARGON / CO2 - 216023
Recommended Use of the Chemical and Restriction on Use: Industrial use (welding)
Details of Manufacturer or Importer: Primus Australia Pty Ltd
3/20 Enterprise Drive
Bundoora VIC 3083
Phone Number: 03 9468 4400
Emergency telephone number: National Poison Information Centre: 13 11 26

2. HAZARDS IDENTIFICATION

Hazardous Nature:

⚠️ gas cylinder
Press. Gas H280 Contains gas under pressure; may explode if heated.

Label Elements
Signal Word Warning

Hazard Statements
H280 Contains gas under pressure; may explode if heated.

Precautionary Statements
P410+P403 Protect from sunlight. Store in a well-ventilated place.

3. COMPOSITION AND INFORMATION ON INGREDIENTS

Chemical Characterization: Mixtures
Description: Mixture of substances listed below.

<table>
<thead>
<tr>
<th>Hazardous Components:</th>
<th>Description</th>
<th>Percent</th>
</tr>
</thead>
<tbody>
<tr>
<td>7440-37-1 argon</td>
<td>Press. Gas, H281</td>
<td>86%</td>
</tr>
<tr>
<td>124-38-9 carbon dioxide</td>
<td>Press. Gas, H280</td>
<td>14%</td>
</tr>
</tbody>
</table>

4. FIRST AID MEASURES

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention if breathing problems develop.

Skin Contact: Not expected to present a significant hazard.

Eye Contact: Not expected to present a significant hazard.

Ingestion: Ingestion is not considered a potential route of exposure.

Information for Doctor

Symptoms Caused by Exposure:
High concentrations may cause asphyxiatio. Symptoms may include loss of consciousness. Victim may not be aware of asphyxiatio.
Low concentrations of CO2 cause increased respiration and headache.
High concentrations of CO2 cause rapid respiratory failure. Symptoms are headache, nausea, vomiting and loss of consciousness.

(Contd. on page 2)
5. FIRE FIGHTING MEASURES

Suitable Extinguishing Media: Use fire extinguishing methods suitable to surrounding conditions.

Specific Hazards Arising from the Chemical:
Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode. Use water spray to cool fire exposed containers.
May accumulate in confined spaces, particularly at or below ground level.

Special Protective Equipment and Precautions for Fire Fighters:
Wear Safe Work Australia approved self-contained breathing apparatus and full protective clothing.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures:
Wear Safe Work Australia approved self-contained breathing apparatus and full protective clothing. Evacuate all non-essential personnel from affected area. Do not breathe vapours. Ensure adequate ventilation.

Environmental Precautions:
In the event of a major spill, prevent spillage from entering drains or water courses.

Methods and Materials for Containment and Cleaning Up:
Stop leak if safe to do so. Ensure adequate ventilation.

7. HANDLING AND STORAGE

Precautions for Safe Handling:
Use of safe work practices are recommended to avoid inhalation of vapours. Use only outdoors or in a well-ventilated area.
Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Only experienced and properly instructed persons should handle gases under pressure.
Open slowly the valve in order to avoid pressure shot. Do not allow backfeed into the container. Avoid the backfeed of water. Protect cylinders from physical damage; do not drag, roll, slide or drop. When moving cylinders, even for short distances, use a cart. Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready or use. Close container valve after each use and when empty, even if still connected to equipment. Do not attempt to transfer gases from one cylinder/container to another. Do not use direct flame or electrical heating devices to raise the pressure of a container.
Food, beverages and tobacco products should not be stored or consumed where this material is in use. Do not smoke while handling product.

Conditions for Safe Storage:
Store in a cool, dry and well ventilated area. Do not expose to the sun or temperatures exceeding 50 °C. Keep containers in upright position. Protect from heat, sparks, open flames and other sources of ignition. Keep away from combustible materials. Containers' valve guards or caps should be in place. Check periodically for damage or leaks.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure Standards:
7440-37-1 argon
NES Asphyxiant
124-38-9 carbon dioxide
NES STEL: 54000 mg/m³, 30000 ppm
TWA: 9000 mg/m³, 5000 ppm

(Contd. on page 3)
Engineering Controls:
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapour below occupational exposure standards. Oxygen gas detectors should be used when asphyxiating gases may be released. A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk.

Personal Protective Equipment (PPE):

Respiratory Protection:
Wear Safe Work Australia approved self-contained breathing apparatus in case of insufficient ventilation or leaks. See Australian Standards AS/NZS 1715 and 1716 for more information.

Skin Protection:
Safety leather gloves, protective clothing and safety boots. See Australian Standards AS/NZS 2161, 2210.1 and 2210.2 for more information.

Eye and Face Protection:
Safety glasses with top and side shields or goggles. See Australian Standards AS/NZS 1336 and 1337 for more information.

9. PHYSICAL AND CHEMICAL PROPERTIES

</table>

10. STABILITY AND REACTIVITY

Possibility of Hazardous Reactions: No hazardous reactions will occur.

Chemical Stability: Stable at ambient temperature and under normal conditions of use.

Conditions to Avoid: Heat, sparks, open flames and other sources of ignition.

Incompatible Materials: Combustible materials.

Hazardous Decomposition Products: No hazardous decomposition products known.
11. TOXICOLOGICAL INFORMATION

Toxicity:

Acute Health Effects

Inhalation:
High concentrations may cause asphyxiation. Symptoms may include loss of consciousness. Victim may not be aware of asphyxiation. Low concentrations of CO2 cause increased respiration and headache. High concentrations of CO2 cause rapid respiratory failure. Symptoms are headache, nausea, vomiting and loss of consciousness.

Skin: No irritating effect.

Eye: No irritant effect.

Ingestion: Ingestion is not considered a potential route of exposure.

Skin Corrosion / Irritation: Based on classification principles, the classification criteria are not met.

Serious Eye Damage / Irritation: Based on classification principles, the classification criteria are not met.

Respiratory or Skin Sensitisation: No sensitising effects known.

Germ Cell Mutagenicity: Based on classification principles, the classification criteria are not met.

Carcinogenicity: This product does NOT contain any IARC listed chemicals.

Reproductive Toxicity: Based on classification principles, the classification criteria are not met.

Specific Target Organ Toxicity (STOT) - Single Exposure:
Based on classification principles, the classification criteria are not met.

Specific Target Organ Toxicity (STOT) - Repeated Exposure:
Based on classification principles, the classification criteria are not met.

Aspiration Hazard: Based on classification principles, the classification criteria are not met.

Chronic Health Effects: No information available

Existing Conditions Aggravated by Exposure: No information available

12. ECOLOGICAL INFORMATION

Ecotoxicity: No information available

Aquatic toxicity: No information available

Persistence and Degradability: No information available

Bioaccumulative Potential: No information available

Mobility in Soil: No information available

13. DISPOSAL CONSIDERATIONS

Disposal Methods and Containers:
Do not discharge into any place where its accumulation could be dangerous.
Dispose according to applicable local and state government regulations.

Special Precautions for Landfill or Incineration:
Please consult your state Land Waste Management Authority for more information.

14. TRANSPORT INFORMATION

UN Number 1956
SAFETY DATA SHEET
According to Safe Work Australia

Product Name: DISPOSABLE ARGON / CO2 - 216023

(Contd. of page 4)

Proper Shipping Name: COMPRESSED GAS, N.O.S. (Argon, Carbon dioxide)

Dangerous Goods Class: 2.2

Packing Group: Not applicable

Marine pollutant: No

EMS Number: F-C,S-V

Hazchem Code: 2TE

Special Provisions: 274, 292

Limited Quantities: 120 mL

Packagings & IBCs - Packing Instruction: P200

Packagings & IBCs - Special Packing Provisions: Not applicable

Portable Tanks & Bulk Containiners - Instructions: Not applicable

Portable Tanks & Bulk Containers - Special Provisions: Not applicable

15. REGULATORY INFORMATION

Australian Inventory of Chemical Substances:
7440-37-1 argon
124-38-9 carbon dioxide

16. OTHER INFORMATION

Creation Date: 05.06.2014

Prepared by: MSDS.COM.AU Pty Ltd www.msds.com.au

Abbreviations and acronyms:
GHS: Globally Harmonized System of Classification and Labelling of Chemicals
EINECS: European Inventory of Existing Commercial Chemical Substances
ELINCS: European List of Notified Chemical Substances
CAS: Chemical Abstracts Service (division of the American Chemical Society)
IARC: International Agency for Research on Cancer
STEL: Short Term Exposure Limit
TWA: Time Weighted Average
NES: National Exposure Standard (Safe Work Australia - Workplace Exposure Standards For Airborne Contaminants)

Disclaimer
This MSDS is prepared in accord with the Safe Work Australia document “Code of Practice for the Preparation of Safety Data Sheets for Hazardous Chemicals - December 2011”
