4. First aid measures

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 131 126, New Zealand 0800 764 766).

Inhalation:	Remove to fresh air, keep warm and at rest. If symptoms persist. Seek medical attention.
Skin:	Remove contaminated clothing. Wash off any skin contamination immediately with plenty of water. Launder clothes before re-use.
Eye:	Remove contact lenses if present. Irrigate eye thoroughly with eye wash solution or clean water for at least 10 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Seek medical attention.
Ingestion:	DO NOT induce vomiting. Wash out mouth with water and give plenty of water to drink (at least 300 ml.). Obtain medical advice if symptoms persist.
Notes to physician:	Treat symptomatically.

5. Fire-fighting measures

Suitable extinguishing media:	All extinguishing media are allowed; select the appropriate extinguishing media depending on the surrounding fire and environment.
Extinguishing media which must not be used for safety reasons:	Not available.
Specific hazards arising from the chemical:	Non-combustible.
Fire Fighting:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
HAZCHEM code	None.

6. Accidental release measures

Personal precautions:	Provide adequate ventilation. Avoid breathing dust. Refer to section 8 of SDS for personal protection details.
Containment procedures:	Prevent uncontrolled discharges into the environment (rivers, water courses, sewers etc.). See exposure scenarios covering intended use in the environment like de-icing and dust suppression.
Methods for cleaning up:	Clean up contamination/spillages as soon as they occur. Collect as much as possible in a suitable clean container, preferably for re-use, otherwise for disposal. Wash the spillage area with large quantities of water.

7. Handling and storage

Precautions for safe handling:	Avoid contact with skin and eyes. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.
Storage:	Store at a dry place, not above normal room temperature.

8. Exposure controls/personal protection

Control parameters	
Occupational exposure limits	No exposure limits noted for ingredient(s).

Biological limit values:	No biological exposure limits noted for the ingredient(s).
Appropriate engineering controls:	Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
Personal protective equipment:	
Eye/face protection:	Wear suitable eye/face protection. Most materials for protective goggles and face visors will probably be suitable eg. polycarbonate.
Skin protection:	Normal working clothes is suitable.
Respiratory protection:	In the case of high dust levels wear suitable respiratory protective equipment, ie. dust mask or respirator conforming to EN standards. Recommended filter = particle filter,P2.
Hand protection:	Wear suitable chemical resistant protective gloves for frequent or prolonged operations tested to EN374 with an acceptable permeation test. Suitable materials include neoprene (chloroprene), PVC and nitrile rubber. Contaminated gloves should be carefully rinsed with water before reuse. Non suitable materials: Leather gloves.
