SUBMERSIBLE WATER PUMP
750W
INSTRUCTION MANUAL

SPECIFICATIONS
Motor: 750W
Max. Flow Rate: 13,000l/h
Max. Head: 8m
Max. Immersion: 7m
IP Rating: IPX8
Max Particle Size: Ø30mm
Water Temp.: 1°C - 35°C
Weight: 5.0kg

WHAT’S IN THE BOX
- Submersible Pump
- L-Shape Connector
- Universal Adaptor

ozito.com.au

3 YEAR REPLACEMENT WARRANTY
PSCD-750
**SUBMERSIBLE PUMP**
1. Float Switch Cable
2. Float Switch Adjustor
3. Float Switch
4. Folding Legs
5. Air Bleed Valve
6. Suction Base
7. Outlet
8. Power Cable
9. Handle

**ACCESSORIES**
10. L-Shape Connector
11. Universal Adaptor
12. Air Bleed Valve Tool

**SETUP & PREPARATION**

**1. UNIVERSAL ADAPTOR**

Ensure the pump is disconnected from the power supply before performing any of the following operations.

Preparing the Universal Adaptor
The universal adaptor is designed to fit various sizes of pipes and fittings.

To fit a 25mm (1'') rigid pipe or flexible tubing (temporary or permanent application)
- No cutting of the universal adaptor is required. It is ready to be fitted with a 25mm (1'') rigid pipe or flexible tubing (not included).

To fit a 25mm (1'') tap adaptor (temporary application only)
1. Cut the universal adaptor using a hack saw
2. It is now ready to be fitted with a 25mm (1'') screw on tap adaptor (not included).

To fit a 32mm (1¼'') rigid pipe or flexible tubing (temporary or permanent application)
- Cut the universal adaptor using a hack saw. It is now ready to be fitted with a 32mm (1¼'') rigid pipe or flexible tubing (not included).

**NOTE:** TO USE THE PUMP IN PERMANENT INSTALLATIONS WITH RIGID PIPES, INSTALL A NON-RETURN VALVE TO AVOID THE WATER FLOWING BACK THROUGH THE PUMP WHEN IT HAS STOPPED.
1. Screw the L-shape connector into the pump housing by rotating in a clockwise direction.

2. Make sure the L-shape connector is firmly tightened so that the O-ring is compressed between the pump housing and the L-shape connector. This ensures no leakage will occur at this point.

3. Screw the prepared universal adaptor clockwise onto the L-shape connector. *Note:* The hose/tube/tap adaptor should not be connected at this stage.

4. Securely attach the hose/tube/tap adaptor to the universal adaptor, fit hose clamps if you are using flexible hose or tube, and tighten well.

**CAUTION:** THIS PRODUCT IS INTENDED FOR PUMPING WATER IN A HOME DOMESTIC APPLICATION. DO NOT USE IT FOR CORROSIVE, ABRASIVE, EXPLOSIVE OR DANGEROUS LIQUIDS.

### 3. FLOAT SWITCH

The pump is fitted with a float switch, which controls how the pump switches on and off.

1. When the float switch cable is able to move freely, the pump will function down to a water depth of 50mm and automatically shut off.

2. To set the pump to switch off at a higher water level, insert the float switch cable into the adjuster. *Note:* There must be a minimum of 100mm of cable from the adjuster to the float.

3. When the float switch is about 30° higher than horizontal (start up level) or above the handle, the pump will turn ‘on’ and operate.

4. When the float switch is 30° lower than the horizontal or below the handle, the pump will turn ‘off’.
4. SETUP

1. Ensure the distance from the lowest to the highest point that you wish to distribute the water does not exceed 7 metres.

2. Ensure that the container is large enough to allow the float switch to move freely and function effectively. A minimum area of 50cm is required on either side of the pump.

3. The pump must not be placed into mud or on debris greater than 30mm depth. When used in dirty water, it is recommended to place the pump on a clean hard surface such as a concrete block to avoid the pump becoming clogged.

The pump has 3 folding legs that can be folded down to increase the height of the pump when standing in water that has particles or debris at the bottom.

1. To adjust the feet, simply fold the legs DOWN for dirty water.

2. To adjust the feet, simply fold the legs UP for clean water.

CAUTION: NEVER CARRY, LIFT OR PULL UP THE PUMP BY THE POWER CORD. THIS WILL DAMAGE THE CORD AND PUMP.

5. OPERATE

IMPORTANT: BEFORE SUBMERGING THE PUMP IN WATER, UNWRAP THE POWER CABLE AND ENSURE THE PLUG IS CLEAR OF ANY DAMP LOCATIONS.

This pump must be used with a residual current device with a rated residual current of 30mA or less.

1. Immerse the pump in the water. For deep water, use a rope (not included) and secure it to the handle. Set the pump in the desired position within the work area or tank.

2. Insert the plug into the mains power socket. Avoid using extension cords as this can lead to a voltage drop which may cause power loss and overheating. Switch on the mains power to commence operation.

3. To stop operation, turn off the mains power. The pump will also stop operation automatically once the float switch reaches the minimum water depth.

Priming

When immersed and ON, the pump will need to prime and purge the air inside the pump before water flows at the outlet. This can take up to 20 seconds. If operating the pump manually, tilting the pump to allow some air to escape from the base can help. Air also escapes from the Air Bleed Valve. When pumping the water pressure will shut this valve off.

Manual Mode

If you wish to use the pump down to minimum water depth, the float switch will need to be operated manually. The pump can be manually turned "ON" by lifting the float switch to the required level.

</tr>
<tr>
<td>Legs Extended-Dirty Water</td>
<td>85mm</td>
<td>30mm</td>
</tr>
</tbody>
</table>
6. AIR BLEED VALVE

Cleaning the Air Bleed Valve

The air bleed valve must be kept clean for correct operation in automatic, unattended operation for reliable priming. The valve should be cleaned if required. When immersed in water air bubbles should be visible coming out of the hole in the side of the pump while the trapped air is being purged. If no air bubbles are seen the valve may be blocked. Clean by inserting the air bleed valve tool into the hole to push the ball in the valve down and unblock, then flush with clean water. Cleaning steps as shown below

1. Insert the Air bleed valve cleaning tool (supplied) into the whole on the side of the pump

2. Push the tool in as shown below

3. Push the tool in as shown below

4. Push the tool in as shown below

5. Hold down and flush with water
### INSTALLATION

![Diagram of pump installation](image)

- **Power Cable:** 11m
- **Max. Head:** 8m
- **Max. Immersion Depth:** 7m

### TROUBLESHOOTING

<table>

**ELECTRICAL SAFETY**

**WARNING!** When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage.

Read and understand the manual prior to operating this pump.

Save these instructions and other documents supplied with this pump for future reference. The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.

Note: The supply of 230V and 240V on Ozito pumps are interchangeable for Australia and New Zealand.

This pump is earthed in accordance with AS/NZS 60335-2-41.

**GENERAL SAFETY WARNINGS**

**WARNING!** Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury. Save these instructions.

1. **Work area safety**
   a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
   b. Do not operate pumps in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Pumps create sparks which may ignite the dust or fumes.
   c. Keep children and bystanders away while operating a pump. Distractions can cause you to lose control.

2. **Electrical safety**
   a. Pump plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) pumps. Unmodified plugs and matching outlets will reduce risk of electric shock.
   b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
   c. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the pump. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
   d. When operating a pump, use an extension cord suitable for wet conditions. Use of a cord suitable for outdoor use reduces the risk of electric shock.

3. **Personal safety**
   a. Stay alert, watch what you are doing and use common sense when operating a pump. Do not use a pump while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating a pump may result in serious personal injury.

**ADDITIONAL SAFETY INSTRUCTIONS FOR PUMPS**

**WARNING!** This product is intended for pumping water in a Home Domestic application. Do not use it for corrosive, abrasive, explosive or dangerous liquids. Fluids other than water will damage the water pump and/or create a fire hazard. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

**WARNING!** This product is not suitable for use with drinking (potable) water.

This appliance is not intended for use by person (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

- Ensure the water pump is disconnected from mains power when installing.
- Do not install or operate the water pump in an explosive environment or near flammable material.
- Do not operate the water pump without liquid.
- Do not run the water pump dry.

**WARNING!** The water pump together with associated pipework operate under pressure. Do not disconnect water pump or pipework until internal pressure has been released. Failure to do this could result in personal injury and damage to property.

- Avoid inserting hands into the inlets/outlets of the water pump while it is connected to power.
- Before using the water pump, always inspect it visually. Do not use the pump if it is cracked and/or damaged. If the water pump is damaged, contact Ozito customer service.
- The water pump has a built-in thermal protection overload switch. The water pump stops if an overload occurs. The motor restarts automatically after it has cooled down.
- The electrical connection must always be made in a dry area. Make sure that electrical connections are protected from inaudations. Protect the plug and the power cable from heat, oil or sharp edges.

**SPARE PARTS**

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse.

For further information, or any parts not listed here, visit www.ozito.com.au or contact Ozito Customer Service:

Australia 1800 069 486 New Zealand 0508 069 486

E-mail: enquires@ozito.com.au

**CARING FOR THE ENVIRONMENT**

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

Leakage circuit breaker. If the power outlet is earthed, ensure that it is weather proof. If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer to avoid a hazard. The water pump has a built-in thermal protection overload switch. The water pump stops if an overload occurs. The motor restarts automatically after it has cooled down.

Using an Extension Lead

Always use an approved extension lead suitable for the power input of this product. Before use, inspect the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective. Then use an extension lead on a real, always unwind the lead completely. Use of an extension lead not suitable for the power input of this product or which is damaged or defective may result in a risk of fire and electric shock.

**DESCRIPTION OF SYMBOLS**

- **V** Volts
- **Hz** Hertz
- **~** Alternating current
- **W** Watts
- **/min** Revolutions or reciprocation per minute
- **No** No load speed
- **ºC** Degrees celsius
- **kPa** Pressure rating (kilopascals)
- **F** Insulation class
- **IPX8** Ingress protection from water
- **Regulator compliance mark**

**Read instruction manual**

Available spare parts can be ordered through the Special Orders Desk at any Bunnings Warehouse. If you have any further questions, please contact Ozito Customer Service on:
Australia: 1800 069 486
New Zealand: 0508 069 486
enquiries@ozito.com.au
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

**Australia** 1800 069 486  
**New Zealand** 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

**3 YEAR REPLACEMENT WARRANTY**

Your product is guaranteed for a period of **36 months from the original date of purchase** and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: o-rings, bearing, seals, gaskets, universal adaptors, L-shaped connector.

**WARNING**

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
