ORIGINAL INSTRUCTIONS
Cordless Hedge Trimmer

RHT3626DR  RHT3600R
Important!

It is essential that you read the instructions in this manual before assembling, operating, and maintaining the product.

Subject to technical modification.
Safety, performance, and dependability have been given top priority in the design of your cordless hedge trimmer.

**INTENDED USE**

The product is only intended for use outdoors. For safety reasons the product must be adequately controlled by using two handed operation.

The product is designed for home or domestic use. It is intended to cut and trim hedges, shrubs, and similar vegetation.

It should be used in dry, well illuminated conditions.

It is not intended to cut grass, trees, or branches. It should not be used for any other purpose than hedge trimming.

**GENERAL SAFETY WARNINGS**

**WARNING**

Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire, and/or serious injury. Save all warnings and instruction for future reference.

The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

**WORK AREA SAFETY**

- Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
- Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

**ELECTRICAL SAFETY**

- Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
- Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges, and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
- Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges, or moving parts. Damaged or entangled cords increase the risk of electric shock.
- When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.

- If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

**PERSONAL SAFETY**

- Stay alert, watch what you are doing, and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol, or medication. A moment of inattention while operating power tools may result in serious personal injury.
- Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-slip safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injury.
- Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- Do not overreach. Keep proper footing and balance at all times. This enables better control of the power in unexpected situations.
- Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing, and gloves away from moving parts. Loose clothes, jewellery, or long hair can be caught in moving parts.
- If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.

**POWER TOOL USE AND CARE**

- Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
- Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with switch is dangerous and must be repaired.
- Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.
- Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.
- Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool’s operation. If damaged, have the power tool repaired.
before use. Many accidents are caused by poorly maintained power tools.

- Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

- Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

BATTERY TOOL CARE AND USE

- Recharge only with the charger specified by the manufacturer. A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.

- Use power tools only with specifically designated battery packs. Use of any other battery packs may create a risk of fire when used with the power tool.

- When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another. Shorting the battery terminals together may cause burns or a fire.

- Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help. Liquid ejected from the battery; avoid contact. If contact occurs, flush with water. Liquid ejected from the battery may cause irritation or burns.

SERVICE

- Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that safety of the power tool is maintained.

HEDGE TRIMMER SAFETY WARNINGS

- Keep all parts of the body away from the cutting blade. Do not remove the cut material or hold the material to be cut when blades are moving. Make sure the switch is off when clearing jammed materials. A moment of inattention while operating the hedge trimmer may result in serious personal injury.

- Carry the hedge trimmer by the handle with cutter blade stopped. When transporting or storing the hedge trimmer always fit the cutting device cover. Proper handling of the hedge trimmer reduces possible personal injury from the cutter blades.

- Hold the power tool by insulated gripping surfaces only, because the cutter blade may contact hidden wiring or its own cord. Cutter blades contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.

ADDITIONAL SAFETY RULES

- Clear the work area before each use. Remove all objects, such as cords, lights, wires, or strings which can be thrown or become entangled in the cutting means.

- Check the hedge for foreign objects, such as wire fences.

- Never use the product near posts, fences, buildings, or other immovable objects.

- Beware of thrown objects; keep all bystanders, children, and pets at least 15 m away from work area.

- Do not operate in poor lighting. The operator requires a clear view of the work area to identify potential hazards.

- Inspect the product before each use. Check for loose fasteners, etc. Make sure all guards and handles are properly and securely attached. Replace any damaged parts before use. Check for battery pack leaks.

- Do not modify the product in any way.

- Do not allow children or untrained individuals to use the product.

- Wear full eye and hearing protection while operating the product. If working in an area where there is a risk of falling objects, wear appropriate head protection.

- Keep firm footing and balance. Do not overreach. Overreaching can result in loss of balance or exposure to hot surfaces.

- Before starting the product, make sure the cutting blades will not come in contact with anything.

- While operating the hedge trimmer, always hold it firmly with both hands by the two handles. Ensure that the operating position is safe and secure. The manufacturer does not recommend the use of steps or ladders. If higher trimming is required, use an extended-reach tool.

- Blades are sharp. When handling the blade assembly, wear non-slip, heavy duty protective gloves. Do not place your hand or fingers between blades or in any position where they could get pinched or cut. Never touch the blade nor service the product unless the battery pack is removed.

- Switch off and remove the battery pack off before:
  - adjusting the working position of the cutting means
  - cleaning or clearing a blockage
  - leaving the product unattended
  - checking, conducting maintenance, or working on the product

- Do not force the product through heavy shrubbery. This can cause the blades to bind and slow down. If the blades slow down, reduce the pace.

- Do not attempt to cut stems or twigs that are larger than 24 mm, or those obviously too large to feed into the cutting blade. Use a non-powered hand saw or pruning saw to trim large stems.

- Use of hearing protection reduces the ability to hear warnings (shouts or alarms). The operator must pay extra attention to what is going on in the working area.
Your hedge trimmer is equipped with two cutting speeds:

- Setting 1 (hi-speed) - Use this setting as the primary mode of your hedge trimmer. At hi-speed setting, the blade cuts at top speed, which allows quick and precise trimming. This speed is best for the regular maintenance of your hedges.
- Setting 2 (hi-torque) - Use this setting to cut thick or dense hedges. The hi-torque setting provides more cutting power to trim larger branches. This setting is not intended for everyday trimming.

Use the speed switch to change the cutting speed to your desired setting. You should not change the cutting speed while the product is running.

**WARNING**

If the product is dropped, suffers heavy impact, or begins to vibrate abnormally, immediately stop the product and inspect for damage or identify the cause of the vibration. Any damage should be properly repaired or replaced by an authorised service centre.

**TRANSPORTATION AND STORAGE**

- Stop the product, remove the battery, and allow both to cool before storing or transporting.
- Clean all foreign material from the product. Store it in a cool, dry, and well-ventilated place that is inaccessible to children. For extra safety, store the battery separately from the hedge trimmer. Keep away from corrosive agents such as garden chemicals and de-icing salts. Do not store outdoors.
- Cover the blade with the blade protector before storing the product, or during transportation.
- For transportation, secure the product against movement or falling to prevent injury to persons or damage to the product.

**TRANSPORTING LITHIUM BATTERIES**

Transport the battery in accordance with local and national provisions and regulations. Follow all special requirements on packaging and labelling when transporting batteries by a third party. Ensure that no batteries can come in contact with other batteries or conductive materials while in transport by protecting exposed connectors with insulating, non-conductive caps or tape. Do not transport batteries that are cracked or leaking. Check with the forwarding company for further advice.

**MAINTENANCE**

**WARNING**

Use only original manufacturer’s replacement parts, accessories and attachments. Failure to do so can cause possible injury, poor performance and may void your warranty.

**WARNING**

Servicing requires extreme care and knowledge and should be performed only by a qualified service technician. For service we suggest you return the product to your nearest authorised service centre for repair. When servicing, use only identical replacement parts.

**WARNING**

The blades are extremely sharp. To prevent personal injury, exercise extreme caution when cleaning, lubricating and fitting or removing the blade protector.

- Remove the battery before adjusting, maintaining, or cleaning the product.
- You may make adjustments and repairs described in the manual. For other repairs, contact the authorised service agent.
- After each use, clean the body and handles of the product with a soft, dry cloth.
- After each use, clean the debris from the blades with a stiff brush, and then carefully apply a rust preventative lubricant before refitting the blade protector. The manufacturer recommends you to use a rust preventative, lubricant spray to apply an even distribution and reduce the risk of personal injury from contact with the blades. For information about suitable spray product, check with your local authorised service centre.
- Lubricate the blades lightly before use if necessary using the above method.
- Check all nuts, bolts, and screws at frequent intervals for proper tightness to ensure the product is in safe working condition. Any part that is damaged should be properly repaired or replaced by an authorised service centre.

**RESIDUAL RISK**

Even when the product is used as prescribed, it is still impossible to completely eliminate certain residual risk factors. The following hazards may arise in use and the operator should pay special attention to avoid the following:

- Injury caused by the blade. Contact with the blades can cause serious injury. Keep the blade away from your fingers, and gloves and safety glasses or protective goggles. Wear protective clothing and safety equipment.
- Injury caused by vibration. Always use the right tool for the job, use designated handles and restrict working time and exposure.
- Hearing injury cause by exposure to noise. Wear ear protection and limit exposure.

**RISK REDUCTION**

It has been reported that vibrations from hand-held tools may contribute to a condition called Raynaud’s Syndrome in certain individuals. Symptoms may include tingling, numbness and blanching of the fingers, usually apparent upon exposure to cold. Hereditary factors, exposure to cold, and the duration of exposure are the main contributing factors.
cold and dampness, diet, smoking, and work practices are all thought to contribute to the development of the these symptoms. There are measures that can be taken by the operator to possibly reduce the effects of vibration:

- Keep your body warm in cold weather. When operating the product, wear gloves to keep the hands and wrists warm. It is reported that cold weather is a major factor contributing to Raynaud’s Syndrome.
- After each period of operation, exercise to increase blood circulation.
- Take frequent work breaks. Limit the amount of exposure per day.

If you experience any of the symptoms of this condition, immediately discontinue use and see your doctor.

**WARNING**

Injuries may be caused or aggravated, by prolonged use of a tool. When using any tool for prolonged periods, ensure you take regular breaks.

**DESCRIPTION**

See page 6.

**PARTS**

1. Rear handle
2. Trigger
3. Lock trigger for rotating handle
4. Speed switch
5. Front handle
6. Operator presence switch
7. Guard
8. HedgeSweep™ debris sweeper
9. Blade
10. Blade protector
11. Battery pack
12. Battery latch button
13. Charger

**SYMBOLS ON THE PRODUCT**

- Safety alert
  - Please read the instructions carefully before starting the product.

- Beware of thrown or flying objects. Keep all bystanders, especially children and pets, at least 15m away from the operating area.

- Wear ear protection.

- Wear eye protection.

- Always hold the hedge trimmer with both hands when operating.

- Wear non-slip, heavy duty gloves.

- To prevent serious injury, do not touch cutting blades.

- Do not expose to rain or damp condition.

- Remove the battery before starting any work on the product.

- The guaranteed sound pressure level is 85 dB.
- The guaranteed sound power level shown on this label is 96 dB.

- Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.

**SYMBOLS IN THIS MANUAL**

- Note
- Warning

The following signal words and meanings are intended to explain the levels of risk associated with this product.

**DANGER**

Indicates an imminently hazardous situation, which, if not avoided, will result in death or serious injury.

**WARNING**

Indicates a potentially hazardous situation, which, if not avoided, could result in death or serious injury.

**CAUTION**

Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury.

CAUTION

Without safety alert symbol
Indicates a situation that may result in property damage.
UNPACKING

RHT3626DR
RHT3600R

x 1

x 1

x 1

x 1

x 1
1. Adjust the cutting angle as necessary.
2. Ensure the battery is securely attached.
3. Operate the tool with a steady hand.
STORAGE

1. Detach the battery from the tool.

2. Remove the blade from the tool.

3. Store the tool in a secure location.

4. Lock the tool into its storage position.

### VIBRATION LEVEL

**WARNING**

The declared vibration value has been measured with a standard test method and may be used to compare one tool with another.

The declared vibration value may be used in a preliminary assessment of exposure.

The vibration emission during actual use of power tool can differ from the declared total value depending on the ways in which the tool is used.

Identify safety measures to protect yourself based on an estimation of exposure in the actual conditions of use, taking account of all parts of the operating cycle such as the times when the tool is switched off and when it is running idle in addition to the trigger time.
