MULTI PURPOSE SAW
500W
INSTRUCTION MANUAL
SPECIFICATIONS
Input: 500W
Voltage: 230-240V ~ 50Hz
No Load Speed: 500-3000 /min
Stroke Length: 12mm
Blade Fitment: Universal
Cutting Capacity: Timber 100mm
                      Aluminium 6mm
                      Mild Steel 3mm
Weight: 2.5kg

ozito.com.au

3 YEAR REPLACEMENT WARRANTY
MSW-3000

WHAT'S IN THE BOX
Multi-purpose Saw
Blades x 3
Hex Key
Spare Brushes
### MULTIPURPOSE SAW

1. Universal Blade
2. Front Handle
3. Variable Speed Dial
4. Safety Lock-off Switch
5. On/off Trigger
6. Rear Handle with Sure Grip

### ACCESSORIES

1. Spare Brushes
2. Hex Key
3. Metal Blade
4. Scrolling Blade
5. General Purpose Blade

### SETUP & PREPARATION

#### 1. FITTING BLADES

**Before you make any adjustments, make sure the power cord is disconnected from the electricity supply.**

1. Insert the hex key into the blade locking screw. Turn anti-clockwise to loosen the screw but do not remove it completely.

2. Insert the blade. Locate the hole in the blade over the retaining pin and between the clamping plate and holder shaft.

3. Tighten the blade locking screw with the hex key.

Note: Periodically check that the blade is properly secured.
2. CONTROLS

On/Off Switch
1. Pull the safety lock-off switch down and hold.
2. Squeeze the on/off trigger.
3. To turn off, release the on/off trigger.

Variable Speed Dial
1. Scroll through the variable speed dial to select the appropriate speed for the material being cut.

3. OPERATING THE MULTIPURPOSE SAW

1. Securely clamp the workpiece.
2. Turn the multipurpose saw on and wait for it to reach full speed.
3. Apply the saw to the workpiece, guide the blade back and forth in a sawing motion to complete the cut.

NOTE: ONLY SUPPLY SUFFICIENT PRESSURE TO ALLOW THE BLADE TO DO THE CUTTING. DO NOT FORCE THE OPERATION. BLADES COULD BE DAMAGED IF EXCESSIVE PRESSURE IS APPLIED.

The tool is recommended for use with a residual current device with a rated residual current of 30mA or less.
MAINTENANCE

- Keep the ventilation vents of the multipurpose saw clean at all times, if possible, prevent foreign matter from entering the vents.
- After each use, blow air through the multipurpose saw housing to ensure it is free from all dust particles which may build up. Build up of dust particles may cause the multipurpose saw to overheat and fail.
- If the enclosure of the multipurpose saw requires cleaning, do not use solvents but a moist soft cloth only. Never let any liquid get inside the multipurpose saw; never immerse any part of the multipurpose saw into a liquid.

Carbon Brushes

When the carbon brushes wear out, the multipurpose saw will spark and/or stop. Discontinue use as soon as this happens. They should be replaced prior to recommencing use of the multipurpose saw. Carbon brushes are a wearing component of the multipurpose saw therefore not covered under warranty. Continuing to use the multipurpose saw when carbon brushes need to be replaced may cause permanent damage to the multipurpose saw. Carbon brushes will wear out after many uses but when the carbon brushes need to be replaced, take the multipurpose saw to an electrician or a power tool repairer for a quick and low cost replacement. Always replace both carbon brushes at the same time.

Note: Ozito Industries will not be responsible for any damage or injuries caused by the repair of the multipurpose saw by an unauthorised person or by mishandling of the multipurpose saw.

TROUBLE SHOOTING

The on/off trigger is locked.
Ensure you have correctly held the lock-off switch (located on the on/off trigger) down.

CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

ELECTRICAL SAFETY

WARNING! When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage. Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool. Save these instructions and other documents supplied with this tool for future reference.

The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.

Note: The supply of 230V and 240V on Ozito tools are interchangeable for Australia and New Zealand.

This tool is double insulated in accordance with AS/NZS 60745-1; therefore no earth wire is required.

GENERAL POWER TOOL SAFETY WARNINGS

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury. Save all warnings and instructions for future reference. The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety
   a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
   b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. Electrical safety
   a. Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
   b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
   c. Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
   d. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
   e. When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.
   f. If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.
   g. Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing the power tool. Do not use a power tool if the switch does not turn it on and off.

3. Personal safety
   a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool if you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
   b. Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection should be used for appropriate conditions that will reduce personal injuries.
   c. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

   d. Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
   e. Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.
   f. Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.
   g. If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.
   h. Power tool use and care
      a. Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
      b. Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
      c. Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing the power tool. Do not use a power tool if the switch does not turn it on and off.
      d. Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.
      e. Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool’s operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
      f. Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
      g. Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.
      h. Service
         a. Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.
         b. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

MULTIPURPOSE SAW SAFETY WARNINGS

WARNING! Hold power tool by insulated gripping surfaces, when performing an operation where the cutting accessory may contact hidden wiring or its own cord. Cutting accessory contacting a “live” wire may make exposed metal parts of the power tool “live” and could give the operator an electric shock.

- Wear a hard hat, safety glasses and/or face shield.
- Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- Check the blade carefully for cracks or damage prior to operation. Replace cracked or damaged blades immediately.
- Hold the tool firmly during operation.
- Ensure no one is below you when using the tool in elevated conditions.
- Do not point the tool at anyone in the immediate vicinity.
- If the blade hits against objects during operation, damage to the tool or dangerous blade breakage may occur.
- Watch out for cut-off portions of the workpiece being cut. They may fall and cause injury to or someone near you.
- When cutting metals, be cautious of hot, flying debris.
- Do not touch the blade or workpiece immediately after operation; they may be extremely hot and could potentially burn your skin.

WARNING! When making a “blind” cut (you can’t see behind what is being cut), be sure that hidden electrical wiring or water pipes are not in the path of the cut. If wires are present, they must be disconnected at their power source by a qualified person or avoided to prevent the possibility of lethal shock or fire.
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANT YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: carbon brushes, blades, hex key etc.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
- Professional, industrial or high frequency use.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.
