	Section 4. First aid measures
Ingestion:	Ensure that breathing passages are not obstructed. The product will polymerise immediately in the mouth making it almost impossible to swallow. Saliva will slowly separate the solidified product from the mouth (several hours).
Skin:	If lips are accidentally stuck together apply warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Do not pull bonded skin apart. It may be gently peeled apart using a blunt object such as a
	spoon, preferably after soaking in warm soapy water. Cyanoacrylates give off heat on solidification. In rare cases a large drop will generate enough heat to cause a burn.
	Burns should be treated normally after the adhesive has been removed from the skin.
Eyes:	If the eye is bonded closed, release eyelashes with warm water by covering with wet pad. Cyanoacrylate will bond to eye protein and will cause periods of weeping which will help to debond the adhesive. Keep eye covered until debonding is complete, usually within 1-3 days. Do not force eye open. Medical advice should be sought in case solid particles of cyanoacrylate trapped behind the eyelid cause any abrasive damage.
Inhalation:	Move to fresh air, consult doctor if complaint persists.
First Aid facilities:	Eye wash Normal washroom facilities
Medical attention and special treatment:	Treat symptomatically.

Section 5. Fire fighting measures		
Suitable extinguishing media:	Foam, dry chemical or carbon dioxide.	
Improper extinguishing media:	High pressure waterjet	
Decomposition products in case of fire::	Upon decomposition, this product emits carbon monoxide, carbon dioxide and/or low molecular weight hydrocarbons.	
Special protective equipment for fire-fighters:	Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.	

Section 6. Accidental release measures	
Personal precautions:	See advice in section 8 Avoid contact with skin and eyes.
Environmental precautions:	Do not empty into drains / surface water / ground water.
Clean-up methods:	Do not use cloths for mopping up. Flood with water to complete polymerization and scrape off the floor. Cured material can be disposed of as non-hazardous waste.

# Section 7. Handling and storage

Precautions for safe handling:	Use only in well-ventilated areas.
	Use personal protective equipment as described in Section 8.
	Use of dispensing equipment is recommended to minimise the risk of skin or eye contact

Conditions for safe storage:	Store in a cool, dry, well-ventilated area. For optimum shelf life store in original containers under refrigerated conditions at 2 - 8°C (35.6 - 46.4 °F) Keep away from heat and direct sunlight.
	Keep container tightly sealed.

Section 8. Exposure controls / personal protection

### National exposure standards:

None

None

Engineering controls:	General room ventilation is usually adequate. Provide local ventilation for prolonged use in a confined area.
Eye protection:	Safety goggles or safety glasses with side shields.
Skin protection:	Use nitrile gloves and aprons as necessary to prevent contact. Do not use PVC, nylon or cotton.
Respiratory protection:	If inhalation risk exists, wear a respirator or air supplied mask complying with the requirements of AS/NZS 1715 and AS/NZS 1716.

Section 9. Physical and chemical properties	
Appearance:	colourless to yellowish Liquid
Odor:	Sharp
Flash point:	80 - 93 °C (176 - 199.4 °F)
Density:	1.1 g/cm3

# Section 10. Stability and reactivity

Stability:	Stable under normal conditions of temperature and pressure.
Conditions to avoid:	Extremes of temperature. Polymerizes on contact with moisture.
Incompatible materials:	Rapid exothermic polymerization will occur in the presence of water, amines, alkalis and alcohols.
Hazardous decomposition products:	In case of fire toxic gases can be released. carbon oxides.

# Section 11. Toxicological information

Health Effects: Ingestion:	Not expected to be harmful by ingestion. Rapidly polymerizes (solidifies) and bonds in mouth. It is almost impossible to swallow.
Skin:	Causes skin irritation. Bonds skin in seconds.
Eyes:	Irritating to eyes. Causes excessive tearing. Eyelids may bond.
Inhalation:	Causes respiratory tract irritation.
Aggrevated med. condition:	Pre-existing skin, eye and respiratory allergies.
