

# Manual Controls

ZXT 200, ZCT 300, ZOZ 032, ZZZ 201

## Out of Reach Skylights

ZXT 200/ZCT 300

### Colour & Material

Silver / Grey. Clear anodized aluminium. Plastic handle cover & hook.

### Application

VELUX rod controls are used to operate openable skylights, manual blinds for skylights and manual blinds for roof windows in out of reach installations.

### Operation ZXT 200

ZXT 200 Extension Rod. The rod is a straight rod with a hook on the end, designed to hook into the handrail of the manual blinds. Pulling or pushing the rod will operate the blinds up or down.

Length: 1 metre – extends to 1.85 metres  
For: Manual blinds

## Within Reach Skylights

ZOZ 032/ZZZ 201

### Colour & Material

Silver / Grey / White. Clear anodized aluminium. Plastic handle cover & hook.

### Application

VELUX in-reach controls are used to operate openable skylights and manual blinds for skylights.

### Operation ZOZ 032

ZOZ 032 Short Rod. The rod is a short version of the ZCT 300, and will operate a manual openable skylight within reach. One rod can operate multiple skylights.

Length: 60cm  
For: Manual openable skylight

### Operation ZCT 300

ZCT 300 Extension Rod. The rod has a crank handle winder with a hook on the opposite end, which connects to a hook on the skylight. Turning the handle will open or close the skylight. One rod can operate multiple skylights.

Length: 1.45 metres – extends to 2.85 metres  
For: Manual openable skylight

### Operation ZZZ 201

ZZZ 201 Winder Handle. The winder handle is a crank handle fixed permanently onto the manual openable skylight. One handle is needed per skylight.

Length: 120mm  
For: Manual openable skylight

### Important Note

When determining the correct rod control needed, consider: Rod controls will be held in home owner's hands approximately 1.5 metres above floor level. An additional 1 metre extension can be ordered if needed.
