

Thank you

for choosing Protector DIY Barrier and Security Doors

All our doors are manufactured to the highest standards, ensuring many years of trouble free usage.

Fixed and adjustable doors are available so you can be sure of a perfect fit whatever size your door frame is.

- » All frames are powder coated aluminium and carry a 10 year warranty.
- » Everything you need is included with your door, locks, hinges, handles and fixings.
- » Security doors conform to Australian Standard AS 5039-2008

The Doric Difference

The high quality locks and hinges used in all our doors are supplied by Doric and are backed with a 6 year warranty

Doric Products, is Australia's largest privately owned hardware manufacturer, supplying innovative door and window hardware that regularly exceed market expectations for quality.

BARRIER & SECURITY DOORS

PRODUCT GUIDE

MAKE IT EASY
Protector^{AI}

SEC022015

CHOOSING YOUR DOOR

Once you have measured the doorway and determined the size of the door you require. Simply select the most suitable door from our extensive range shown.

Protector Fixed Barrier Doors – available with minimal assembly required off the shelf in either Metric and Imperial door sizes. These doors have a single lock latch assembly and an aluminium grille.

Protector Adjustable Doors – can be adjusted to fit most door openings. They are available in both Barrier and Security options with 3 choices of internal panel as well as 3 choices of frame colour. (Primrose only available in some stores)

BARRIER OR SECURITY?

The difference between Barrier and Security Doors are the locks, a Barrier Door has a single lock whereas a Security Door has a triple lock which bolts shut at the top, middle and bottom to comply with AS5039 – 2008. The frames and grilles are the same high quality components in each door.

Note: Note: Security Doors are only available in the adjustable door range. Barrier Doors are available in either fixed or adjustable.
