Extinguishing Media:	Non-flammable and does not support combustion. In case of fire in the surroundings, use appropriate extinguishing media.
Hazchem Code:	None allocated.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Accidental release:
Any spillage should be cleaned up promptly and swept up into covered containers.

SECTION 7 - HANDLING AND STORAGE

Handling:
Use product in well ventilated area. Prevent the build of dust in the work atmosphere. Avoid inhalation of dust, and skin or eye contact. Always maintain high standards of personal hygiene.

Storage:
Store in cool, dry and well ventilated area. Protect bags from damage. Avoid generation of dust.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

National Exposure Standards No exposure standard has been established for this product by the ACGIH. However, ASGIH recommended value for inhalable particulates is 10mg/m³ TLV/TWA (for inspirable dust), and 3mg/m³ (for respirable dust).

Quartz (Crystalline Silica):
Time Weight Average (TWA): (respirable fraction) 0.1 mg/m³
(≤ 7 microns particle equivalent aerodynamic diameter).
(TWA refers to the average airborne concentration of a substance during an eight-hour work shift for a five-day working week).

Engineering Controls: Use in well ventilated areas. Avoid high dust concentration.

Personal Protective Equipment: Wear rubber or PVC gloves to prevent skin contact. Where dust is a problem use a P2 type canister Respirator. Wear chemical safety glasses to prevent eye contact.

SECTION 11 - TOXICOLOGICAL INFORMATION

Health Effects:	There is no known effect from chronic exposure to Dolomite Lime. Inhalation of dust should be avoided.
<u>Acute</u>	
Inhalation:	High dust concentration of air-borne material may cause irritation to the nose and upper respiratory tract; symptoms may include coughing and sore throat.
Skin:	Prolonged contact may cause some irritation, including redness and itching. No harmful effects from skin absorption have been recorded.
Eye:	May cause irritation, redness and pain following contact.
Swallowed:	Product not considered harmful if swallowed, but ingestion of large amounts may cause gastrointestinal irritation and blockage.
<u>Chronic</u>	<p>SafeWork Australia has not yet classified crystalline silica as a carcinogen. Crystalline silica in this product, although present as a fine sand, it is not present at a respirable size and therefore the likelihood of inhaling free crystalline silica will be remote.</p> <p>The International Agency for Research on Cancer (IARC) recommended that crystalline silica should be classified as carcinogenic to humans due to the risk of silicosis (the disease which causes a scarring of the lungs).</p>
