Argon					✓	✓	✓	✓	✓
Coregas 5/2 MIG shielding gas	✓	✓	✓	✓					

Argon

- Recommended for MIG welding of aluminium
- Suitable applications include TIG welding of plate, tubing, sheet metal, furniture and automotive

Coregas 5/2 MIG shielding gas

- Produces minimal spatter, good weld appearance and good control when positional welding
- Suitable for thicknesses up to 8mm

Both Argon and Coregas 5/2 MIG shielding gas

- Suitable for light to medium fabricators and home enthusiasts
- Typical applications include welding of metal plate, tubing, sheet metal, furniture and automotive
- Thickness that can be welded depends on the capacity of the welding equipment in use
