AIR COMPRESSOR KIT

6LITRE 1.5HP INSTRUCTION MANUAL

SPECIFICATIONS

- Power supply: 220–240V ~ 50Hz
- Motor: 1200W (1.5HP)
- Tank Capacity: 6L
- No Load Speed: 3,450/min
- Max. Pressure: 8bar (116psi)
- Max. Air-Intake Volume: 180 L/min
- Free Air Delivery (FAD): 56.4 L/min
- IP Rating: IP20
- Weight: 11.5kg

ozito.com.au

3 YEAR REPLACEMENT WARRANTY

STANDARD EQUIPMENT

- Air Compressor
- Air Gun
- 6.3m Air Hose
- Inflation Adapters x 8
- Connection
- Accessories x 10

ozito.com.au

3 YEAR REPLACEMENT WARRANTY

IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

WARRANTY

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: valve adapters and accessories.

WARNING

The following actions will result in the warranty being void:

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
- Professional, industrial or high frequency use.
**Pre Setup Checks**

- Examine the machine for signs of transit damage. If damaged, do not use, return to place of purchase.
- The compressor should be set up near to the user.
- Avoid long air lines and long supply lines (extensions).
- Make sure the intake air is dry and dust-free.
- Do not set up the compressor in damp or wet rooms.
- The compressor is designed to be used in dry rooms. It is prohibited to use the compressor in areas where work is conducted with sprayed water. Before you use the machine, make sure that the mains voltage complies with the specifications on the rating plate.

**Connecting Air Hose to the Compressor**

1. Attach the 1/4" female nitto quick plug to the air hose. Use pipe tape on all threads to ensure a good air seal.

2. Insert the 1/4" male nitto quick plug of the air hose into the quick-lock coupling of the air compressor by pulling back the sleeve and inserting the plug.

3. The quick-lock sleeve will spring forward automatically, connecting the air hose.
Connecting to the Compressed Air Hose

WARNING! BEFORE CONNECTING OR DISCONNECTING ACCESSORIES, ALWAYS MAKE SURE THAT THE COMPRESSOR IS OFF.

1. Insert the 1/4 female nitto coupler connector to the end of the male connector on the air hose.

2. Attach the 1/4" male nitto quick plug into the air tool you wish to use.

3. Pull back the sleeve of the quick-lock coupling whilst pushing in the 1/4" nitto quick plug. The quick-lock sleeve will spring forward automatically, connecting the accessory.

Disconnecting

1. To disconnect the air tool, pull back the sleeve on the quick-lock coupling and remove the tool.

Switching On

1. Attach the desired tool to the quick release coupling of the air hose.

2. Connect the compressors power cord to the mains power supply.

3. To switch ON the equipment, set the On/Off switch to position "I" (On).

Switching Off

1. To switch OFF the equipment, move the On/Off switch to position “0” (Off). Disconnect the power cord from the mains.

2. Disconnect tools from air hose.

3. Pull the safety release valve until no air remains in the compressor air tank.

WARNING! COMPRESSED AIR CAN BE A DANGEROUS FORM OF ENERGY. GREAT CARE IS REQUIRED WHEN USING THE COMPRESSOR AND ITS ACCESSORIES.
## 3. INFLATING

### Setup

1. Attach the desired tool to the quick release coupling of the air hose.

2. Connect the compressors power cord to the mains power supply.

3. To switch ON the equipment, set the On/Off switch to position “I” (On).

4. Set the compressor to the desired inflation pressure, using the pressure adjustment dial.

### Inflating Tyres

1. Attach the tire chuck to the hose to the compressed air hose.

2. The tyre chuck included in this kit is made for “schrader” valves.

3. Check compressor is set to the correct pressure. Pressure can be adjusted using pressure adjustment dial.

4. To inflate the tyre, hold down the tyre chuck onto the schrader valve.

5. After a short time, release the air chuck and check the air pressure with the pressure gauge.
4. BLOWER PISTOL

Inflating other items
The compressor kit is supplied with a variety of adapters that can be fitted to the rubber hose or air gun. These adapters are suitable for different valves that are often used on inflatable items:

- **Adapter A** is used for footballs, basketballs, soccer balls etc.
- **Adapters B&C** are used for rubber dinghies, inflatable small swimming pools and air beds.
- **Adapter D** is used for bicycle or car tyres with “Schrader” valves.
- **Adapter E** is used for blowing air to clear work spaces of sawdust or other fine material.

Attaching inflation accessories to the Blow Gun

1. To fit the sports ball inflator you’ll need to fit the included nozzle adaptor and screw it into the front of the blow gun.
2. Once the adaptor is installed you can then insert the desired inflation nozzle.
3. Once it is inserted, you can then attach the blow gun to the hose via the nitto fittings.

Using the Blower Pistol

1. Attach the blow gun nozzle to the blow gun.
2. By varying the pressure on the trigger, you can control the amount of compressed air released through the air nozzle.
3. The blower nozzle adapter is useful for blowing dust out of hollow spaces or hard to reach areas, such as vents in electrical items or between the keys of a keyboard. It is also useful for cleaning soiled equipment.

**WARNING!** OPERATOR IS ADVISED TO WEAR EYE PROTECTION WHEN USING THE AIR GUN. TAKE CARE NOT TO BLOW DIRT OR OTHER LOOSE PARTICLES TOWARDS YOURSELF OR OTHER PERSONS

**WARNING!** DO NOT DIRECT THE JET OF COMPRESSED AIR TOWARDS PEOPLE OR ANIMALS.
6. CLEANING & MAINTENANCE

**WARNING!** BEFORE CLEANING YOUR COMPRESSOR OR CARRYING OUT ANY MAINTENANCE PROCEDURE, MAKE SURE THAT THE MOTOR IS OFF AND THE TOOL DISCONNECTED FROM THE POWER SUPPLY TO PREVENT ACCIDENTAL STARTING.

**WARNING!** WAIT UNTIL THE COMPRESSOR HAS COMPLETELY COOLED DOWN. RISK OF BURNS!

**WARNING!** ALWAYS DEPRESSURIZE THE EQUIPMENT BEFORE CARRYING OUT ANY CLEANING AND MAINTENANCE WORK.

### Cleaning

- Keep the safety devices free of dirt and dust as far as possible. Wipe the equipment with a clean cloth or blow it with compressed air at low pressure.
- We recommend that you clean the appliance immediately after you use it.
- Clean the appliance regularly with a damp cloth and some soft soap. Do not use cleaning agents or solvents; these may be aggressive to the plastic parts in the appliance. Ensure that no water can get into the interior of the appliance.
- You must disconnect the hose and any spraying tools from the compressor before cleaning. Do not clean the compressor with water, solvents or the like.

CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

SPARE PARTS

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse.
For further information, or any parts not listed here, visit www.ozito.com.au or contact Ozito Customer Service:
Australia 1800 069 486
New Zealand 0508 069 486
E-mail: enquiries@ozito.com.au
**ELECTRICAL SAFETY**

**WARNING!** When using mains-powered tools, basic safety precautions, including the following, should always be followed to avoid risk of fire, electric shock, personal injury or damage to electrical equipment.

- **Read the whole manual carefully and make sure you know how to switch the tool on in an emergency, before operating the tool.**
- **Save these instructions and other documents supplied with this tool for future reference.**
- The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.
- **Note:** The 230V and 240V models are interchangeable for Australia and New Zealand.
- **If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.**

**GENERAL POWER TOOL SAFETY WARNINGS-PERSONAL SAFETY**

**WARNING!** Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

- **Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.**

1. **Work area safety**
   - a. **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
   - b. **Do not operate power tools in explosive atmospheres,** such as in the presence of flammable liquids, gases or dusts. Power tools create sparks which may ignite the dust or fumes.
   - c. **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

2. **Electrical safety**
   - a. **Power tool plugs must match the outlet.** Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
   - b. **Avoid body contact with earthed or grounded surfaces,** such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
   - c. **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
   - d. **Do not abuse the cord.** Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
   - e. **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.

3. **Personal safety**
   - a. **Always use the switch which you are doing and use common sense when operating a power tool.** Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.
   - b. **Protective equipment such as dust mask, non-slip safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.**
   - c. **Prevent unintentional starting.** Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the power tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

- **Children being supervised are not to play with the appliance.**

**WARNING!** Before connecting a tool to a power source (mains switch power point power tool), your mains-operated (corded) power tool or battery-operated (cordless) power tool, be sure that the voltage supply is the same as that specified on the nameplate of the tool. A power source with a voltage greater than that specified for the tool can result in serious injury to the user, as well as damage to the tool. If in doubt, do not plug in the tool. Using a power source with a voltage less than the nameplate rating is harmful to the motor.

- **Always remove the plug from the mains socket before making any adjustments or maintenance.**
- **To reduce the risk of fire or explosion, never spray flammable liquids in a confined area.** If sparks come into contact with petrol vapours or solvents, they may ignite the vapours and cause a fire or explosion.
- **Always operate the compressor in a well ventilated area.** Do not smoke while spraying. Do not spray where sparks or flames are present. Keep the compressor as far away from the spray area as possible.
- **The fluids trichloroethane and methylene chloride can chemically react with the aluminum used in some paint spray guns and form an explosion.** If these solvents are used, ensure that only oilsoluble spray equipment is used. The compressor is not affected by the use of these solvents.
- **Never directly inhale the compressed air produced by a compressor and do not use it for charging breathing tanks.**
- **Do not use welding equipment in close proximity to the compressor.** Do not weld anything to the air tank of the compressor: this could dangerously weaken the tank and void the warranty.
- **Do not use the compressor outdoors when it is raining or on a wet surface; either situation could cause electric shock.**
- **Always maintain a safety distance of at least 3 meters between the compressor and the work area.** Ensure that the compressor is on a stable surface.
- **Never let the compressor come into contact with water or other liquids, as the appliance is live, this could cause electrocution**. Never use the appliance with bare feet, wet hands or wet feet.
- **Never pull on the power cable to disconnect the plug from the power outlet or to move the compressor.**
- **The compressed air produced by the compressor cannot be used for pharmaceutical, food or medical purposes or to fill the air bottles of scuba divers.**
- **Do not cover the air inlets on the compressor.**
- **Compressors and lines rise high temperatures during operation. Avoid contact! Risk of burns!**
- **Gases or vapours drawn in by the compressor have to be kept free of constituents that may cause fire or explosions inside the compressor.**

**AIR COMPRESSOR SAFETY WARNINGS**

**WARNING!** Even when the tool is used as prescribed it is not possible to eliminate all residual risk factors. The manufacturer shall not be liable for any changes made to the tool nor for any damage resulting from such changes.

**USING AN EXTENSION LEAD**

- **Always use an approved extension lead suitable for the power input of this tool.** Before use, inspect the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective.
- **When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.**

**The power outlet for the compressor is recommended to be protected by a 30amp residual current device (RCD) on the power supply.**

**WARNING!** Never pull the blow-out gun at other persons and never use it to clean clothes that are still being worn. Power tools create sparks which may ignite the dust or fumes.

**WARNING!** Be certain to read all the labels on the containers of paint or other materials to be sprayed. Closely follow all safety instructions. Use a respirator mask if there is a chance that you might otherwise inhale the spray material. Carefully check the effectiveness of any respirator mask you intend to use.

**WARNING!** Always wear safety goggles or glasses when using the air compressor. Never point the nozzle of an air hose towards any part of your body or towards another person.

**WARNING!** Keep the compressor at least 300mm from the nearest wall to ensure adequate ventilation for cooling purposes.

**WARNING!** Protect the air hose and cordset from damage. Inspect for weak or worn spots regularly and replace if necessary.

**WARNING!** Avoid using an extension cord with this product. Use additional air hose instead of an extension cord to prevent power loss and possible damage to the motor. Use of an extension cord voids the warranty.

**WARNING!** Always switch off the compressor before switching off the power or removing the power plug.

**WARNING!** After using the compressor, switch off the on/off button, disconnect the power supply and release any remaining pressure.

**WARNING!** Do not attempt to remove any part of the machine whilst it is under pressure.

**WARNING!** Use all safety equipment such as safety goggles or shield, ear protection, breathing or respirator mask and protective clothing.

**WARNING!** Wear goggles, wear ear muffs, wear a breathing mask

**WARNING!** Never try the outlet air of this compressor directly on to any part of a person’s body. Do not attempt to block the air outlet with your finger or any part of your body.

**WARNING!** The tool must be used only for its prescribed purpose. Any use other than those mentioned in this Manual will be considered a case of misuse. The user and not the manufacturer shall be liable for any damage or injury resulting from such cases of misuse.

**WARNING!** The tool shall not be liable for any changes made to the tool nor for any damage resulting from such changes.

**WARNING!** In the event that an air hose is cut or broken, the air supply must be turned off at the compressor. A broken air line which is not supported is extremely dangerous and can whip around very quickly, both with the capability of striking people, and blowing foreign particles into their eyes. Do not attempt to cut the air line but immediately keep bystanders well clear and turn off the air supply to the hose, turn off the compressor at the Dn’ Off button, and then remove the hose from the compressor.
