

HERITAGE RANGE

# ELEVATED WHEELCHAIR PLANTER

**SM** : 800<sub>mm</sub> (L) 400<sub>mm</sub> (W) 850<sub>mm</sub> (H)

**LG** : 1200<sub>mm</sub> (L) 400<sub>mm</sub> (W) 980<sub>mm</sub> (H)

## IMPORTANT

**ASSEMBLE ON A FLAT LEVEL SURFACE**

This heritage timber bed is manufactured from the highest quality cypress heartwood. To prevent discolouration it is recommended that once filled the outside surface is coated with a quality natural oil or stain.

Before filling the bed with soil, ensure it is square and level.

Be aware that this timber product may splinter so it is recommended that protective gloves are worn during assembly.

DOWELS x 7

CENTRE  
POST x 1

LARGE  
POSTS x 3

SMALL  
POSTS x 3

# ASSEMBLY

## STAGE 01

Start from the centre post (shown in orange)  
**ENSURE THE LONG SLOTS IN THIS POST  
 FACE INTO THE SHORT BED**

Applying equal downwards force slide the relevant  
 boards into the posts  
**SEE RIGHT HAND SIDE DETAIL**

**The base support boards must go  
 at the bottom and face inwards in  
 relation to the bed**

## STAGE 02

Slide in the remaining boards ensuring the grooved  
 (reeded) side of the timber boards face inwards &  
 the Birdies branded long boards are located in the  
 top row and facing outwards.

## STAGE 03

Place in the base boards ensuring the lip of each  
 overlaps as shown in the detail to the right.

## STAGE 04

Spread the base boards evenly across the base of  
 the bed.

## STAGE 05

Insert the 4 hardwood dowels into the holes on the  
 top of the posts by hand and then place 4 caps  
 over these dowels. Push down to secure.

### OPTIONAL

Wood glue can be used to fix the cap in place.

## STAGE 06

Lay the black geotextile fabric in evenly. Allow  
 excess fabric to lay up the walls.  
 Start filling by placing the soil into each corner of  
 the planter whilst holding the fabric up, this will  
 prevent soil from washing away once filled. Trim  
 excess fabric with scissors.
