

# Leaf & Debris Controller

<b>Description:</b>	Leaf & Debris Controller including 300 Dropper		
<b>Product Code:</b>	000470	<b>13 Digit Barcode</b>	9312703000470
<b>APN:</b>	9312703000470	<b>14 Digit Barcode</b>	19312703000477

## Included in the package

- 1 x Leaf and Debris Controller Rainhead **1**
- 1 x Leaf and Debris Controller Gutter Dropper **2**
- 1 x Leaf and Debris Controller Main Grille (plastic or metal) **3**
- 1 x Leaf and Debris Controller Fine Filter **4**

## Features

Stops leaves, debris and mosquitoes entering rainwater systems

Can be retrofitted to most systems even those without eaves

Fits all common downpipes using Icon Plastics range of adaptors

Fine Filter keeps mosquitoes out and pull out drawer means easy cleaning

Sturdy **RPVC** construction means low maintenance and easy cleaning

**RPVC** can be painted to match the colour of any downpipe system

## Function

Reduces water contamination in tanks and reduces blockages in stormwater and down-pipes by filtering leaves and debris at the point they enter the system. This also effectively reduces fire risk by moving leaves away from guttering systems.

This leaves only water to enter the collection system. The specially-designed dropper directs water flow to the centre of the metal or plastic grill where leaves are dispersed across the width of the grill and prevented from entering the rainwater system. The grill is also designed to break up water surface tension so sheeting will not occur and water will flow more freely into the Rain Head.

The mounting system is designed to suit most situations and means the Leaf and Debris Controller can be mounted on fascia board or directly to a wall if there are no eaves.

The mounting lugs provide a simple and direct method of attaching to the Leaf and Debris Controller to walls or fascia.

## Cleaning and Maintenance

The RPVC construction means cleaning is as simple as washing the Leaf and Debris Controller with mild soapy water.

The Fine Filter drawer must be regularly removed and cleaned.

Cleaning once a fortnight is recommended.

## Adaptors

If required, Icon Plastics has adaptors available to facilitate installation

**Always consider local council requirements and have a licensed plumber complete installation when required.**
