

FIBREGLASS & FOAMS

Diggers Fibreglass Cloth & Strips

DESCRIPTION

Diggers Fibreglass Cloth and Strips are woven strands of fibreglass used in conjunction with **Diggers Fibreglass Resin** to provide extra strength and flexibility to fibreglass, metal and timber and other rigid substrates.

A common reinforcement used with polyester resin for hand lay-up. Strips are stuck together to form a mat in differing thicknesses on uneven surfaces. **Diggers Fibreglass Cloth and Strips** use the same strands as fibreglass matting but are woven rather than chopped, leaving a finish that is much smoother, stronger and more flexible.
