

GOGO Juice

A pro-biotic liquid for
your soil & plants

GOGO Juice

100% Organic

GOGO Juice is the result of some six years extensive research and development, stretching from a consulting scientist in the USA to our own microbiologist here in Australia.

The very first trial batch was 'brewed' in anaerobic conditions (with no air added), utilising a 20 litre home brewing beer kit!! Today GOGO Juice is commercially manufactured aerobically (with air added) in huge stainless steel vats over an 8-12 week brewing period.

GOGO Juice is teeming with microbiology and is essentially a pro-biotic for your soil and plants.

These microbes activate the natural processes that occur in the soil, speeding up the decomposition of the residual organic and mineral compounds, ultimately increasing the nutrient availability and stimulating growth.

GOGO Juice combines the 'catalytic' power of the billions of beneficial bacteria along with the well documented benefits of applying kelp, seaweed, fish, humic acid and manure. Hence, you are not only feeding your plants with all the goodness of a wide range of organic nutrients, but you are also providing your soil with the "workers" (beneficial bacteria) that assist in breaking down the organic matter, maximising the nutrients available to your plants.

The carefully selected microbes have been proliferated utilising complex carbohydrates and sugars through a unique aerobic brewing system in which the kelp, seaweed, humic acid and manure have been digested by the beneficial bacteria.

The resultant product provides a huge boost of the living microbiology necessary for your soil and plants to perform at their optimum level, increasing their ability to resist pest and disease and to withstand heat and frost stress.

Stimulates Growth

The microbiology in GOGO Juice promotes plant growth as well as stimulating and improving root growth and development.

Applications

Suitable for year round application on your whole garden.

GOGO Juice is ideal for your vegetable patch, natives and all potted plants, as well as being a great kick start for your compost heap by adding the microbes needed to help speed up the process.

UNTREATED GOGO JUICE

GoGo Juice trials conducted by Graham Douglass, Chairman of the Wynn Vale Community Garden.

Improves Root Growth

Application Rates

10mls (1 capful) of GOGO Juice diluted in 5 litres of water will treat 1-2 square metres of soil or potting mix. For optimum results apply every month.

Storage and Use

GOGO Juice contains live organisms – do not mix with fungicides or bactericides. Store in a cool place, away from direct sunlight and below 30°C. Gloves and a breathing mask should be worn at all times when handling microbial products. Use diluted product within 1 week of dilution.

Year round fertilising for year round health

Like humans and animals, plants require regular feeding throughout the year – at least once in each season.

Happy, healthy, well nourished plants are more resistant to pests, diseases, heat stress and frost.
