CLASS III

SEAL GAS & WATER PIPE METAL THREADS

LIQUID SEALANT IS SUITABLE FOR ALL GAS AND WATER PIPE METAL THREADS.

APPLICATION:

1. Remove oil contamination from the area where the sealant is to be applied.
2. Apply sealant to one surface, covering 2-3 thread rotations.
3. Curing time is 10-20 minutes depending on material, however full cure time is 24 hours.
4. Hand tools are required for disassembly.

CAUTION:

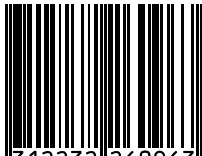

Not suitable for plastic threads. Not recommended for continuous steam temperatures above 135°C. Apply this product with good ventilation. If product comes into contact with eyes or skin, flush with clean water immediately. Store in a cool, dry area. Keep away from children.

Approved by the Australian Gas Association
(Certificate No. 7583 Class III - 2000kPA)
