Correct Disposal of Battery

- This marking printed in the batteries attached to your Air Conditioning product is information for end-uses.
- Batteries, at their end-of-life, should be disposed of separately from general household waste. Please, dispose of batteries correctly at your local community waste collection or the recycling center.
### 2. DISPLAY AND BUTTONS

#### 2.1 DISPLAY

Information are displayed when the remote controller is powered up.

- **ON/OFF display**
  - Appears when the unit is turned on, and disappears when it is turned off.

- **ECO display**
  - Displays when X-ECO feature is activated.

- **Battery display**
  - Low battery detection

- **Temperature/Timer display**
  - Displays the set temperature by default, or timer setting when using TIMER ON/OFF functions
  - Temperature range: 17-30°C
  - Timer setting range: 0-24 hours

- **Fan speed display**
  - Displays selected fan speed:
    - Low speed
    - Medium speed
    - High speed
    - AUTO

- **LED display**
  - Displays when TIMER ON is set
  - Displays when TIMER OFF is set

- **MODE display**
  - Displays the current mode, including:
    - AUTO
    - COOL
    - HEAT
    - FAN

- **Transmission Indicator**
  - Lights up when remote sends signal to indoor unit

- **MODE display**
  - Displays the current mode, including:
    - AUTO
    - COOL
    - HEAT
    - FAN

- **TIMER ON display**
  - Displays when TIMER ON is set

- **TIMER OFF display**
  - Displays when TIMER OFF is set

- **Silence feature**
  - Not available for this unit

- **Follow me feature**
  - Not available for this unit

- **LOCK feature**
  - Sleep mode display

---

Note:

All indicators shown in the figure are for the purpose of clear presentation. But during the actual operation only the relative functional signs are shown on the display window.

---

#### 2.2 BUTTONS

- **On/Off**
  - Press to start operation. Press again to stop.

- **Mode**
  - Press the mode button to switch the mode in turn.

- **My Mode**
  - Press to memorize or resume your favorite pre-settings.

- **Swing**
  - Starts and stops horizontal louver movement.

- **Fix**
  - Used to set the desired up/down air flow direction. The louver changes 6 degree in angle for each press.

- **LED**
  - Press to turn on/off the LED display. Keep pressing 2 more seconds to activate or disable Fresh function.

- **ECO Sleep**
  - Press to enter Sleep Mode

---

NOTE:

1. Above illustration shows all the features. For actual model, only the relevant parts are shown.
2. Buttons design might be slightly different from the actual one.
3. HOW TO USE BASIC FUNCTIONS

3.1 BASIC OPERATIONS

**ATTENTION** Before operation, please ensure the unit is plugged in and power is available.

**AUTO Mode**
Select AUTO mode → Set your desired temperature → Turn on the air conditioner

**NOTE:**
1. In AUTO mode for heat pump system, the air conditioner can automatically choose the mode of Cool, Heat or Fan by sensing the difference between the actual room temperature and setting temperature.
2. In AUTO mode for cooling only system, the air conditioner can automatically choose the mode of Cool or Fan by sensing the difference between the actual room temperature and setting temperature.
3. In AUTO mode, fan speed can not be set.

**COOL or HEAT Mode**
Select COOL/HEAT mode → Set the temperature → Set the fan speed → Turn on the air conditioner

**DRY Mode**
Select DRY mode → Set the temperature → Turn on the air conditioner

**NOTE:**
In DRY mode, fan speed can not be set since it has already been automatically controlled.

**FAN Mode**
Select FAN mode → Set the fan speed → Turn on the air conditioner

3.2 TIMER FUNCTION

**TIMER ON/OFF - Set the amount of time after which the unit will automatically turn on/off.**

**TIMER ON**
Press timer to initiate the ON time sequence.
Press Temp. up or down button for multiple times to set the desired time to turn on the unit.
Point remote to unit and wait 2sec, the TIMER ON will be activated.

**TIMER OFF**
Press timer to initiate the OFF time sequence.
Press Temp. up or down button for multiple times to set the desired time to turn off the unit.
Point remote to unit and wait 2sec, the TIMER OFF will be activated.

**NOTE:**
1. When setting the TIMER ON or TIMER OFF, the time will increase by 30 minutes increments with each press, up to 10 hours. After 10 hours and up to 24, it will increase in 1 hour increments. (For example, press 6 times to get 2.5h, and press 21 times to get 11h.) The timer will revert to 0.0 after 24.
2. Cancel either function by setting its timer to 0.0h.

**Setting TIMER ON & OFF (example).**

*Example:* If current timer is 1:00PM, to set the timer as above steps, the unit will turn on 2.5h later (3:30PM) and turn off at 6:00PM.
4. HOW TO USE ADVANCED FUNCTIONS

**Swing**
- Press Swing button
- The horizontal louver will swing up and down automatically when pressing Swing button.
- Press again to make it stop.
- Keep pressing this button more than 2 seconds, the vertical louver swing function is activated.
- Press this button 2 seconds more to activate the function.

**Fix**
- Press Fix button
- The horizontal louver will move an angle of 6 degrees for each press.
- Press the button until the louver reaches your preferred location.
- Keep pressing this button more than 2 seconds, the vertical louver swing function is activated.

**ECO Sleep**
- Press ECO Sleep button under Auto/Cool/Heat mode
- The set temp. will increase or decrease by 1°C per hour for the first 2hrs. Please refer to the OWNER'S MANUAL for more details.
- This Sleep operation saves energy and improves nighttime comfort by synchronizing with the body’s metabolism. The sleep function is not available in Fan or Dry mode.

**High Power (Turbo) or Self Clean**
- Press this button to activate High Power (Turbo) feature. It enables the unit to reach the set temperature in the shortest time.
- Keep pressing this button more than 2 seconds, the unit will clean itself to avoid bacteria growing around heat exchanger.
- The unit will operate at the biggest capacity output to reach the setting Temp. quickly.

**My Mode**
- Press this button more than 2 seconds
- Press this button
- The unit will memorize the current setting mode, Temp., fan speed.
- The unit will restore to the setting you made last time.
- My Mode function enables you to memorize or restore your favorite settings (mode, temperature, and fan speed). The default memorized setting is AUTO mode, 26°C and AUTO fan.

**Follow Me or Smart eye**
- Press this button to activate Follow me. This function can adjust room temperature based on the controller’s sensor and make you comfortable.
- Keep pressing this button more than 2 seconds, the smart eye function is activated and will detect people activities in the room.
- The controller will display the actual temperature at its location and send this signal to indoor unit every 3 minutes.

**LED or Fresh**
- Press LED button
- Press this button more than 2 seconds
- The ionizer or Plasma dust collector (model dependent) is energized.
- Press this button under COOL or DRY Mode more than 2 seconds
- The unit will enter low fan mode to dry up the coil. The cleaning cycle takes 15–30 mins, after which the unit will turn off automatically.

**Note:** Please place the controller in the location where the indoor unit can receive the signal.
4. HOW TO USE ADVANCED FUNCTIONS

**F.P.**
Press this button 2 times during one second under HEAT Mode and setting temperature of 17°C.
The unit will operate at high fan speed (while compressor on) with temperature automatically set to 8°C.

Note: This function is for heat pump air conditioner only.
Press this button 2 times under HEAT Mode and setting temperature of 17°C to activate the freeze protection function. It will help to keep the room above 0°C (freezing point) in severe cold winter.
Press On/Off, Sleep, Mode, Fan and Temp. button while operating will cancel this function.

**Lock Mode 1**
Press together **button** and **button** at the same time more than 2 seconds to activate Lock Mode 1 function.
Enter lock mode 1 by pressing **button** and **button** at the same time more than 2 seconds. At lock mode 1, all buttons will not response except press these two buttons again to disable locking.

**Lock Mode 2**
Press together **button** and **button** at the same time more than 2 seconds to activate lock mode 2 function.
Enter lock mode 2 by pressing **button** and **button** at the same time more than 2 seconds. At lock mode 2, all buttons will not response except press ON/OFF, TEMP UP and DOWN buttons or press these two buttons again to disable locking.

**Silence**
Keep pressing Fan button for more than 2 seconds to activate/disable Silence function.
Due to low frequency operation of compressor, it may result in insufficient cooling and heating capacity.
Press ON/OFF, Mode, Sleep button, turn on F.P. or Self clean function while operating will cancel silence function (Model dependent).

**X-ECO**
Press this button under COOL Mode to enter the energy efficient mode.
The unit will enter the energy efficient mode.

Note: This function is only available under COOL mode for heat pump air conditioner only.
Under cooling mode, press this button, the remote controller will adjust the temperature automatically to 24°C, fan speed of Auto to save energy (only when the set temperature is less than 24°C). If the set temperature is above 24°C, press the X-ECO button, the fan speed will change to Auto, the set temperature will remain unchanged.

Note: Pressing the X-ECO button, or modifying the mode or adjusting the set temperature to less than 24°C will stop ECO operation.
Under ECO operation, the set temperature should be 24°C or above, it may result in insufficient cooling. If you feel uncomfortable, just press the X-ECO button again to stop it.
