

Choose your Door

Once you have measured the doorway and determined the size of the door you require, simply select the most suitable door from our extensive range.

Protector Security and Barrier Doors

Available in standard fixed Metric and Imperial door sizes plus a Flex-Fit option that can be adjusted to fit most non-standard door openings.

Security or Barrier

The difference between Barrier and Security is the locks, a Barrier comes with a single lock whereas a Security has a triple lock. The frames and grilles are the same high quality components in all doors.

Choice of Grilles and Colours

Choose from 3 grille styles and 2 frame colours, off the shelf, or you can order custom colour frames to suit your home colour scheme.

- » Frames are powder coated aluminium and carry a 10 year warranty
- » Kit includes locks, hinges, handles plus detailed instructions.

Security Doors Proven Strength

All Security doors have a 3-point locking system which bolts shut at the top, middle and bottom. These doors have passed rigorous Australian Standards testing for strength and conform to AS5039-2008

- » Conform to Australian Standard AS 5039-2008

How It Works

It's as simple as 1,2,3! Follow the steps shown to purchase or order your product. If you need further advice, speak to a Team member at the Special Orders Desk in-store.

1. Select The Product You Want

View the extensive range available in this brochure or online to select the item that best suits your needs.

2. Order At The Special Orders Desk

After you have selected the product you want, take this brochure to the Special Orders Desk.

3. Collect Your Order

Upon placing your order, your product will arrive in store within 3-4 weeks*.

*Metro stores only. Regional stores may take longer.

How to measure your door frame

- Determine if your door will be hinged to the left or right hand side when viewed from the street. Doors can be hinged either right or left, by simply rotating the door 180° to suit.
- Decide whether your door will swing in or out – most security doors swing out. Hinges face the side they open toward (ie face in for inward opening and out for outward).
- Check that door handle will not hit your existing door handle, if it does you may have to hinge it from the other side. Centre of barrier door handle is 1210mm from the bottom of door.
- Measure the height and width of opening as per diagram.

Note: Doors are cut and/or assembled to be square, regardless if the door frame is not square, therefore they will be cut using the smallest width & height measurements.
