**IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELpline:**

Australia 1800 069 486  
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

**WARRANTY**

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

**3 YEAR REPLACEMENT WARRANTY**

Your product is guaranteed for a period of 36 months from the original date of purchase. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: grinding discs, carbon brushes, disc guard, flange.

**WARNING**

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
**KNOW YOUR PRODUCT**

**ANGLE GRINDER KIT**
1. Spindle Lock Button
2. Grinding Guard
3. Side Handle
4. Safety Lock Off Button
5. On/Off Trigger

**ACCESSORIES**
6. Pin Wrench
7. Inner Flange
8. Outer Flange
9. Metal Grinding Disc x 3
10. Spare Brushes

---

**SETUP & PREPARATION**

**1. SIDE HANDLE & SAFETY GUARD**

**CAUTION:** ENSURE THE TOOL IS DISCONNECTED FROM THE POWER SUPPLY BEFORE PERFORMING ANY OF THE FOLLOWING OPERATIONS.

**Fitting the Side Handle**
The side handle can be fitted on either side of your grinder. The correct position will be determined by your preferred hand and the operation being performed.

1. Firmly attach the side handle in the desired position by rotating clockwise.

2. To remove the side handle rotate it anti-clockwise.

**Adjusting the Safety Guard**
The safety guard must be used at all times whilst operating the angle grinder.

1. Loosen guard locking lever and slide the guard over the spindle by aligning with the recess.

2. Rotate the safety guard into the desired position.

3. Tighten the guard lever to secure in position.

**ONLINE MANUAL**
Scan this QR Code with your mobile device to take you to the online manual.

---

**3 YEAR REPLACEMENT WARRANTY**
2. GRINDING DISC FITMENT

Inspect the grinding disc before fitment to ensure it is not cracked or deformed. The grinding disc is suitable for grinding tasks only. Only use grinding discs with a diameter of 125mm.

1. Depress and hold the spindle lock button.
2. Rotate the spindle to locate the lock position.
3. Use the pin spanner to loosen the outer flange.
4. Insert the disc with the label facing up.
5. Screw the outer flange onto the spindle.

Note: The flat side of the flange locates against the disc.

6. Depress and hold the spindle lock button. Firmly tighten the outer flange with the pin spanner.

CAUTION: REGULARLY CHECK THAT THE OUTER FLANGE HAS NOT BECOME LOOSE DURING OPERATION.

3. ON/OFF SWITCH

The angle grinder is fitted with a lock-off button to avoid accidental start up.

1. Press and hold the lock-off button down.
2. Press the on/off trigger to start the grinder.
3. To stop the grinder, release the on/off trigger.

WARNING: THE TOOL IS RECOMMENDED FOR USE WITH A RESIDUAL CURRENT DEVICE WITH A RATED RESIDUAL CURRENT OF 30MA OR LESS.
4. \textbf{GRINDING}

1. Ensure the disc, outer flange and safety guard are fitted securely.

2. Make sure the workpiece is securely held down.

3. Switch the angle grinder on.

4. Begin grinding your workpiece. The optimum grinding angle is 10-15° to the workpiece. Do not apply excessive pressure. Allow the tool to do the work. This will prevent deep gouging.
MAINTENANCE

• Keep the ventilation vents of the angle grinder clean at all times, if possible, prevent foreign matter from entering the vents.
• The grease in the gearbox will require replacement / replenishment after extensive use of the grinder. Please see a qualified electrical repairer to provide this service.
• After each use, blow air through the angle grinder housing to ensure it is free from all dust particles which may build up. Build up of dust particles may cause the angle grinder to overheat and fail.
• If the enclosure of the angle grinder requires cleaning, do not use solvents but a moist soft cloth only. Never let any liquid get inside the angle grinder; never immerse any part of the angle grinder into a liquid.
• Make sure grinding wheels are stored flat when not in use.
• Ensure grinding wheels haven’t been dropped and have no cracks or damage before use.

Carbon Brushes

When the carbon brushes wear out, the angle grinder will spark and/or stop. Discontinue use as soon as this happens. They should be replaced prior to recommencing use of the angle grinder. Carbon brushes are a wearing component of the angle grinder therefore not covered under warranty. Continuing to use the angle grinder when carbon brushes need to be replaced may cause permanent damage. Carbon brushes will wear out after many uses but when the carbon brushes need to be replaced, take the angle grinder to an electrician or a power tool repairer for a quick and low cost replacement. Always replace both carbon brushes at the same time.

Note: Ozito Industries will not be responsible for any damage or injuries caused by the repair of the angle grinder by an unauthorised person or by mishandling of the angle grinder.

SPARE PARTS

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse.
For further information, or any parts not listed here, visit www.ozito.com.au or contact Ozito Customer Service:

TROUBLESHOOTING

Sparking visible through the housing air vents
A small amount of sparking may be visible through the housing vents. This is normal and does not indicate a problem.

Excessive sparking visible through the housing air vents and/or the grinder failing to operate
May indicate the carbon brushes have worn out and need to be replaced. Carbon brushes should only be replaced by a qualified electrician or power tool repairer.

CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

Note: Ozito Industries will not be responsible for any damage or injuries caused by the repair of the angle grinder by an unauthorised person or by mishandling of the angle grinder.
**GENERAL POWER TOOL SAFETY WARNINGS**

---

**WARNING!** Read all safety warnings and instructions. Failure to follow the warnings and instructions may result in electric shock, fire, and/or serious injury.

---

1. **WARNING!** This power tool is intended to be used as a grinder or cut-off tool. Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Power tools are dangerous in the hands of untrained users.

---

2. **WARNING!** No alteration, modification or change of any kind must be made to this tool. Damage caused by alteration, modification or change of any kind is not covered by the warranty. The warranty will be void if the tool is altered in any way.

---

3. **WARNING!** Do not use the tool as a grinder while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

---

4. **WARNING!** Use only wheel types that are recommended for your power tool and the specific guard designed for the selected wheel. The incorrect power tool can cause kickback and loss of control.

---

5. **WARNING!** Keep cutting tools sharp and clean. Properly adjusted guard is essential. Do not attempt to make an excessive cut. Abrasive grinding or cutting could result in kickback or torque reaction during start-up. The operator can control torque reactions or kickback forces, if proper precautions are followed.

---

6. **WARNING!** Do not place your hand near the rotating accessory. Accessory may kickback or overheat.

---

7. **WARNING!** Do not position your body in the area where power tool will move if kickback occurs. Kickback will propel the tool in direction opposite to the wheel's movement at the point of snagging.

---

8. **WARNING!** Be aware of the power tool's maximum speed. The wheel may be different from grinding wheel flanges. Wheel flanges may be different from grinding wheel flanges.

---

9. **WARNING!** Wheels for the tool that was not designed cannot be adequately guarded or controlled.

---

10. **WARNING!** Do not grind with the side of a cut-off wheel. Abrasive cut-off wheels are intended for peripheral grinding, side forces applied to these wheels may cause them to shatter.

---

11. **WARNING!** Always use undamaged wheel flanges that are of correct size and shape for your selected wheel. Wheel flanges support the wheel and prevent it from falling out of the guard.

---

12. **WARNING!** The grinding surface of centre depressed wheels must be mounted below the plane of the guard lip. An improperly mounted wheel that projects through the plane of the guard lip cannot be adequately protected.

---

13. **WARNING!** Do not use the wheel in positions where the guard is obstructed. The guard helps to protect operator from broken wheel fragments and accidental contact with the wheel.

---

14. **WARNING!** Do not use worn down wheels from larger power tools. Worn down wheels from larger power tools may be different from grinding wheel flanges.

---

**ELECTRICAL SAFETY**

---

**WARNING!** The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.

---

**Troubleshooting**

---

If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.

---

**Note:** Double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is for added protection against injury resulting from a possible electrical insulation failure within the tool.

---

**Using an Extension Lead**

---

Always use an approved extension lead suitable for the power input of this tool. Before use, inspect the extension lead for signs of damage or ageing. Replace the extension lead if damaged or defective. When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.
