

# TOPDRY Rotary Ground Socket

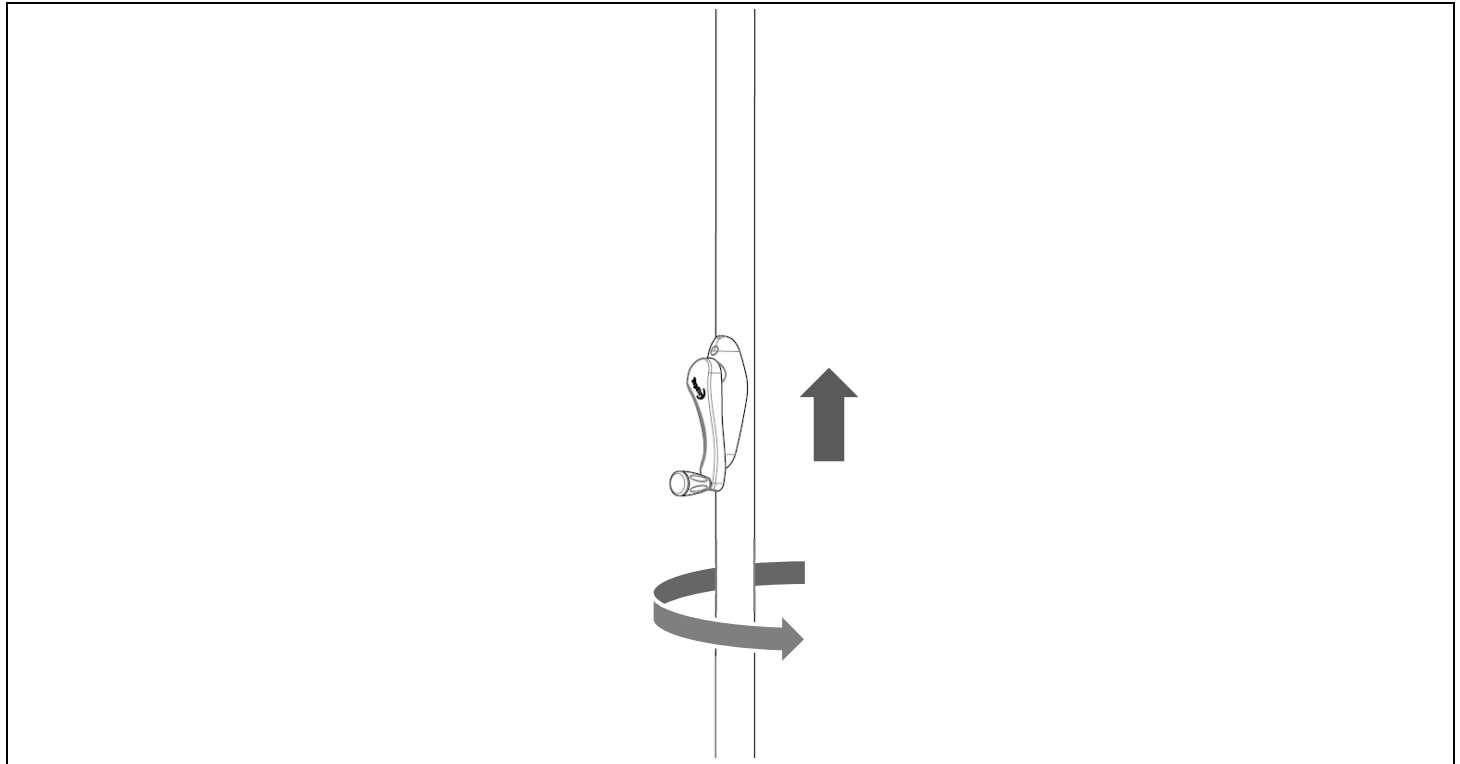

## 1. Choose a location and Install the Ground Socket

1. Choose a suitable location.
2. Dig a hole in the centre of the space 650mm deep and 250mm in diameter.
3. Fill the bottom of the hole with 200mm of dry gravel.
4. Fit the ground socket to the end of the main post. Rotate the post in the ground socket until it locks.
5. Position the Ground Socket and Main Post in the centre of the hole.
6. Ensure the top of the Ground Socket is 5mm above the surface of the concrete.
7. Fill the hole with concrete and use a spirit level to ensure the post and Ground Socket remain vertically level.
8. Smooth the concrete with a trowel
9. Slope the surface of the concrete away from the Ground Socket to aid drainage.
10. Allow the concrete to set for 48 hours before use.
11. Do not remove the Post until the concrete has set.

## 2. Removing the Clothesline from the Ground Socket

Your clothesline can be removed from the ground socket for storage. The Main tube locks to the ground socket for safety

- To remove lift while rotating anti clockwise.
- To replace lower into ground socket and rotate clockwise until it drops into place.

**Fit the cap to the ground socket when the clothesline is removed to prevent objects falling in.**

**Care and Maintenance**

Over time it is possible that soil will enter the ground socket making it difficult to remove your clothesline. To ensure your clothesline does not become stuck we recommend removing it twice a year

## **Warranty - Terms and Conditions**

Any claim under this warranty must be made within one year of the date of purchase of the product.

To make a claim under the warranty, take the product (with proof of purchase) to any Bunnings store (see [www.bunnings.com.au](http://www.bunnings.com.au) for store locations).

Sales Force National Pty Ltd (t/a Zenexus) bears reasonable, direct, expenses of claiming under the warranty. You may submit details and proof into any Bunnings store for consideration.
