

OIL PRODUCTS

Diggers Paraffin Oil

DESCRIPTION

Diggers Paraffin Oil is a colourless hydrocarbon commonly used as a fuel, lubricant and surface sealer. Put simply, Paraffin Oil is candle wax in a liquid form. It is used extensively in 'oil lamps' and as a base for creating scented oils to be burned individually or vaporised in any standard oil burner.

Typical Characteristics

Appearance.....colourless liquid
 Odour.....paraffinic
 Specific Gravity..... 0.85
 Flash Point.....210°C
 Solubility in Water <0.1 Wt%

 **MSDS available**

TYPICAL USES

- Lubricant for precision apparatus and plastic modifier
- Fuel – heating, lighting and cooking
- Water tank surface sealer
- Excellent lubrication oil for hinges and moving parts in sewing machines

FEATURES

- Cost-effective and odourless in its raw form
- Colourless, viscous liquid
- Excellent base for scented oils
- Burns readily and cleanly
- Water-insoluble

APPLICATION

As a Lubrication Oil

Follow machine manufacturer's oiling instructions.

For Sealing Water Tank Surfaces

Add 20ml of **Diggers Paraffin Oil** per m² to water tank to seal water surface. Always keep seal above discharge level.

NOTE: Not for human consumption.
