

Berlin Rugs

Care instructions:

Any spills should be blotted up as soon as possible. Work from the outside of the spill inwards. If spot cleaning is necessary, use a mild detergent solution, or a proprietary carpet and rug cleaning product.

Do not rub the area, as this will change the appearance of the yarn. Take care not to get the yarn and the backing of the rug too wet. Several progressive cleans working inwards will always produce the best result.

Vacuum regularly, but never use a powerhead.
