Important advice for assembly, maintenance and safe use

1. Toys must be assembled by an adult before use exactly in accordance with the instructions.
2. Check all parts are present before you start to assemble the product.
3. Place small parts on a tray or similar, to ensure they are not lost.
4. If any parts are missing do not use the product until the replacement parts are fitted.
5. Remove all packaging before giving to your children or allowing them to play with this product.
6. Ensure your product is sited on level ground. Failure to do this may put additional stress on connections and joints and in time could cause them to fail.
7. Ensure your product is located on a soft impact surface like grass. Never locate your product on hard surfaces like concrete or asphalt.
8. Children must not use this product until properly installed.
9. Adult supervision is required at all times to ensure children play safely. Ensure children's clothing is appropriate for the play activity.
10. Equipment should be checked by an adult at the beginning of each season and at regular intervals during the usage season to ensure it is safe.
11. Pay special attention to all connections and fastenings.
12. Parts may need to be replaced if they show signs of wear and tear. Replace any defective parts in accordance with these instructions.
13. Any changes to this toy, e.g. changing or adding an accessory, must be done in accordance with our instructions. Failure to do this will render your guarantee null and void and may make your product unsafe.
14. The age recommendation for this product is clearly stated on the packaging and these instructions. Please adhere to it at all times.
15. When you dispose of this equipment please do so responsibly.

Safe play free space area

The safe play area refers to the zone extending 200cm around the toys on all sides and 250cm above the toy. The safe play area must be free from all obstacles.

Dimensions

Know about wood.

Unlike steel, wood is a natural, organic material and each piece will be unique, bearing its own knots, cracks and variations in colour and, unlike steel, wood will react significantly to changes in atmospheric conditions.

Wood will expand and contract as fluctuations of temperature and humidity affect the water content of the cell structure. In warm sunny weather it will shrink and in wet weather it will expand. As these physical changes do not, necessarily, take place uniformly throughout a piece of wood, forces are set up which cause cracks and splits to arise.

It is not necessary to stain your Wooden frame

It is made from selected wood which has been pressure treated. This is a process by which preservatives are forced under pressure into the fabric of the timber to protect it from decay and insect damage.

If you do wish to stain your Wooden frame for aesthetic reasons, please use a water-based stain, which is available from any good DIY store.

Build on level ground.

This will help to keep the house square during the build process.

Tools - You will need:

Note: Part numbers with a (P) denotes a painted part depending on product purchased.

ASSEMBLY TIP

To correctly space upright battons, we recommend to use boards MW2143, MW2144 & MW2145 as spacing guides.

These can be temporary fixed by using screws to keep in position during frame build.
