

Wiha SoftFinish® electric slimFix.

The convenient slim solution for electrical applications.

product
design
award

2011

The right tool at a glance, thanks to the printed screw symbol on the handle end.

slimTECHNOLOGY

Applications on live equipment are subject to very special requirements. The focus is on absolute user safety and Wiha demonstrates this with a wealth of details.

The high quality blade insulation is moulded directly onto the blade and therefore guarantees safety when working on live equipment up to 1,500 V DC / 1,000 V AC. To maintain this safety, each screwdriver of the SoftFinish® electric series is individually tested in a water bath at 10,000 Volts according to IEC 60900:2012.

The roll-off protection and the special handle geometry offer optimum handling and electrical safety, even in critical applications.

slimTECHNOLOGY:
Up to 33% reduction of the bit diameter in the critical working area allows effortless access to low-lying fastening/spring elements.

Wiha SoftFinish® electric slimFix.

- Unlimited access
- Blades up to 33% narrower due to integrated insulation
- Tool for spring clips (wedge-profiled output geometry)

Safety Notice:

When working with VDE tools, observe the national safety and accident prevention regulations!

For slotted, Phillips and Pozidriv screws.

3201 SoftFinish® electric slimFix slotted screwdriver.
Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, black-finish. Protective insulation moulded directly onto the blade and completely integrated into the blade in the lower area.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Standards: DIN ISO 2380.
Manufactured acc. to IEC 60900:2012.
Application: For all work on or around electrical components up to 1,000 V AC.
Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated.
