ELECTRIC BLOWER
1800W
INSTRUCTION MANUAL

SPECIFICATIONS
Motor: 1800 Watt
Input: 230 – 240V ~ 50Hz
No Load Speed: 13,500/min
Max. Air Volume: 350m$^3$/hour
Max. Air Speed: 320km/hour
Noise Level: 100dB
Weight: 2.8kg

WHAT'S IN THE BOX
- Blower
- Blow Tube
- Direction Nozzle
- Assembly Screws

ozito.com.au

3 YEAR REPLACEMENT WARRANTY
BLW-1800
1. Unpack the blow tube and direction nozzle.

2. Connect larger end of the direction nozzle to the smaller end of the blow tube.

3. Ensure that all 3 buttons on the blow tube sit within the holes in the direction nozzle.

4. Connect the blow tube to the blower housing, ensuring that the blower housing tabs click into the holes in the blow tube.

5. Secure the blow tube to the blower housing with the two 12mm screws.
Using the extension cord retaining hook

The cord retaining hook is used to “anchor” an extension cord when it is connected to the power lead of the tool. It prevents the extension cord from being accidentally disconnected from the blower’s power cable or shaken loose during use. It should be used at all times.

1. Make a loop in the end of the extension lead and pass the loop though the hole in the rear of the handle.

2. Hook the loop over the cord retaining hook. Pull the extension cord to secure it in position over the cord retaining hook.

3. Connect the extension lead to the power cord.

Route the power and extension cord away from the work area to prevent contact with the blower.

Note: Always use an approved extension lead suitable for the power input of this tool.

2. TRIGGER SWITCH

WARNING! THE POWER SUPPLY FOR THIS PRODUCT SHOULD BE PROTECTED BY A RESIDUAL CURRENT DEVICE RATED AT 30MA OR LESS.

Turning ON
To turn the blower on, depress the trigger switch.

Turning OFF
To turn the blower off, release the trigger switch.
3. USING THE BLOWER

**Blowing**

The blower can be used to clean corners, fences, walls or beneath cars.

Hold the blower firmly, turn the trigger switch on, point the jet of air in front of you and move forward slowly. Move the blower from side to side, with the tube several inches above the ground.

Be careful where you point the jet of air as it can move heavy material and cause injury or damage to bystanders.

**Note.** Be aware of other people and animals in the area where you are to be operating the blower.

**Note.** Avoid collisions with hard objects which could damage your machine.

**WARNING!** DO NOT USE THE BLOWER WITH ANY TYPE OF ACCESSORY OR ATTACHMENT. SUCH USAGE MIGHT BE HAZARDOUS.

4. GENERAL MAINTENANCE

**WARNING:** BEFORE CLEANING YOUR BLOWER OR CARRYING OUT ANY MAINTENANCE PROCEDURE, MAKE SURE THAT THE MOTOR IS OFF AND THE BLOWER IS DISCONNECTED FROM THE POWER SUPPLY TO PREVENT ACCIDENTAL STARTING.

- Keep air intake clean and air vents free of debris to avoid overheating the motor.
- Do not use cleaning agents to clean the plastic parts of the tool. A mild detergent on a damp cloth is recommended. Water must never come into contact with the tool.
- If the blower vibrates abnormally, stop motor immediately. Abnormal vibration usually indicates a mechanical problem continued operation could lead to injury or damage.
- No lubrication is necessary as the motor is equipped with lifetime-lubricated bearings.

**Note:** Ozito Industries will not be responsible for any damage or injuries caused by the repair of the tool by an unauthorised person or by mishandling of the tool.
Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse. For further information, or any parts not listed here, visit www.ozito.com.au or contact Ozito Customer Service:

ELECTRICAL SAFETY

WARNING! When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage.

Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool.

Save these instructions and other documents supplied with this tool for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety
- a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
- c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.
- d. Switch the motor off and remove the plug when the tool is not being used, left unattended, being repaired or cleaned.
- e. Do not operate the tool near people, especially children or pets. Turn it off if they get too close.
- f. Do not operate the tool in the presence of inflammable and/or explosive substances such as fuel, varnish remover or spraypaint.
- g. Use only outdoor rated extension leads that are so marked. Keep the extension cord away from heat, oil, sharp edges or moving parts.
- h. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- i. Do not operate the tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.
- j. If operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of an outdoor extension cord reduces the risk of electric shock.

2. Electrical safety
- a. Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
- b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
- c. Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- d. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- e. When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.
- f. If operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of an outdoor extension cord reduces the risk of electric shock.

3. Personal safety
- a. Keep safety equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce the risk of personal injuries.
- b. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- c. Use only accessories that are recommended by the manufacturer for your model. Accessories not recommended by the manufacturer may cause the risk of injury.
- d. Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
- e. Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- f. Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.

4. Power tool use and care
- a. Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired. Many accidents are caused by poorly maintained power tools.
- b. Keep cutting tools sharp and clean. Sharp, clean cutting tools with properly adjusted guards will do the job better and safer at the rate for which they were designed.
- c. Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.
- d. If the supply cord is damaged during use, disconnect the supply cord from the mains plug whilst in use.
- e. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or similarly qualified persons in order to avoid a hazard.

5. Operation
- a. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or similarly qualified persons in order to avoid a hazard.
- b. This tool is double insulated in accordance with AS/NZS 60335-1; therefore no earth wire is required.
- c. Always use an approved extension lead suitable for the power input of the tool. Before use, inspect the extension lead for signs of damage, wear and aging. Replace an extension lead if damaged or defective. When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.
- d. Supply cords shall not be lighter than:
  - f) rubber insulated, ordinary tough rubber sheathed flexible cord (code designation 60245 IEC 53).
  - g) polyvinyl chloride insulated, ordinary polyvinyl chloride sheathed flexible cord (code designation 60227 IEC 53).

ADDITIONAL SAFETY INSTRUCTIONS FOR BLOWERS

Always wear adequate protective clothing when operating the tool to avoid injuries to face, eyes, hand, feet, head or hearing. Use safety glasses or a face shield, high boots or sturdy shoes, long trousers, work gloves, a hard hat and ear defenders.

- Do not start the tool when it is upside down or when it is not in the operating position.
- Switch the motor off and remove the plug when the tool is not being used, left unattended, being cleaned, being moved from one place to another or when the extension cord is entangled or damaged.
- Do not operate the tool near people, especially children or pets. Turn it off if they get too close.
- Maintain a safe distance of at least 5m from other people when using the tool.
- Never direct the blower direction nozzle towards bystanders or pets. Never blow debris in the direction of bystanders or pets. The operator is responsible for accidents or hazards occurring to other people or their property.
- Do not handle the plug or the tool with wet hands and do not use the tool in the rain.
- Use only outdoor rated extension leads that are so marked. Keep the extension cord away from heat, oil and sharp edges.
- Ensure that the extension lead is secured in a manner that prevents it from disconnecting from the plug whilst in use.
- Keep all the air intakes and the blower tube free of dust, lint, hair and other material that may cause a reduction in air flow.
- Keep a balanced and stable stance while using the tool. Do not switch on the tool in enclosed or poorly ventilated spaces or in the presence of inflammable and/or explosive substances such as liquids, gasses and powders.
- Do get distracted and always concentrate on what you are doing. Use common sense. Never operate the tool when you are tired, sick or under the influence of alcohol or other drugs.
- Do not operate this appliance with long loose hair or loose fitting jewellery. Tie long loose hair back and remove loose fitting jewellery. Only operate the tool during daylight or with adequate artificial light.
- Ensure that the appliance is not intended for use by persons (including young children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Only use the tool according to the instructions given in this manual.
- Check regularly that the screws are tight.
- Do not use the tool in rain or leave outdoors while raining.
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: blower tube, carbon brushes.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
- Professional, industrial or high frequency use.
