AN ENVIRONMENTALLY RESPONSIBLE AID TO MICROFIBRE TECHNOLOGY

Not all 'green' cleaning products are truly environmentally responsible as advertised.

Peerless JAL chemists have spent many years researching and sourcing environmentally responsible cleaning agents to formulate an exceptional cleaner that is truly green.

The Research and Development team at Peerless JAL have developed the only complete environmentally responsible cleaning package on the market today. Each possible area of improvement has been explored to reduce the carbon footprint of the user.

This includes:

- ***Truly green chemicals***
- ***The use of microfibre technology resulting in less chemicals and water used.***
- ***Specialised environmentally responsible packaging for the reduction in plastics used to minimize land fill and carbon footprint.***
- ***Super concentrated chemicals to reduces transport of water resulting in reduced carbon emissions***
- ***100% recyclable Packaging***

Carefully researched and successfully formulated, the eco safe Microaid Amenities cleaner is available to environmentally conscious users of cleaning chemicals.

Microaid Amenities has been designed as an aid for the technologically advanced and effective microfibre cloth. When used with Microaid Amenities the capillary force in the Microfibre removes soap scum, body oils, mould, lime, mildew, water scale and rust deposits on porcelain, tiles, ceramic tiles and fiber glass surfaces.

Microaid Amenities is a biodegradable, phosphate free, chlorine and EDTA free product. It contains no VOC's and is not tested on animals.

It contains a combination of natural acids designed to remove the heavy calcium build up created in "hard water" areas. These Natural acids have been specifically selected as they create a dynamic state in which their combined action creates highly effective sanitizing properties attacking common bacteria that cause bad odour, staining of toilets & baths and mould in showers. The advantage of the synergetic action of the two natural acids is the effective elimination of possible cross infection. Microaid Amenities operates under a reduced pH creating the added advantage of being able to react with hard water deposits.

Microaid Amenities' combined dual acid cleaning, free rinsing and sanitization properties is an ideal washroom cleaner and maintainer.

To reduce future cleaning time, Micro Aid Amenities contains an additive that forms a protective coating on surfaces to prevent re-soiling. Future cleaning will take less time with a superior cleaning result.

Microaid Amenities deodorizes your washroom areas leaving a natural fragrance of bamboo and lime. Packed in 1L soft, recyclable packaging, Microaid Amenities can be diluted as 20 ml in 500 ml for general cleaning or 40 ml in 500 ml of water for heavy duty cleaning.

FEATURES AND BENEFITS

- Super Concentrated: one pack makes over 25 Lt.
- Small packaging: easy to handle, quick dilution technique.
- Environmentally responsible: non toxic and non corrosive.
- Non dangerous and non hazardous.
- Free of Chlorine, Phosphates and Volatile Organic Compounds.
- Biodegradable: safe for aquatic and bird life.
- In conjunction with Microfibre, Microaid Amenities effectively removes: soap scum, body oils, mould, lime, mildew, water scale and rust.
- Cleans: porcelain, tiles, ceramic tiles, toilet bowls, sinks, showers and fiber glass surfaces.
- Reduces future cleaning time.
- Powerful sanitizer.
- Non-rinse.
- Pleasant natural fragrance: deodorizes as it cleans.

- Recyclable packaging.
- Not tested on animals.

TECHNICAL INFORMATION

Description:	Microaid Amenities / Toilet and Bathroom Cleaner
Appearance:	Red / Pink free flowing liquid
pH:	3.50 - 4.50 - Concentrate
Odour:	Bamboo and Lime
Specific Gravity:	1.03
Clarity:	Clear liquid
Classification:	Non DG, Non Hazardous
VOC Content:	No VOC
Toxicological Information:	Not Toxic
Degradability:	Biodegradable

DIRECTIONS FOR USE:

For best results please use Peerless JAL's Microfibre in conjunction with Microaid Amenities.

Fold cloth into 1/2 then 1/2 again. Place Microaid Amenities solution on the cloth or directly onto the surface. Wipe surface - change cloth sides when heavily soiled. Rinse cloth with fresh water, ring out thoroughly and repeat.

For general use dilute 20ml of Microaid Amenities with 500 ml of water.

For heavy duty cleaning dilute 40ml of Microaid Amenities Cleaner with 500 ml of water.

SAFETY: This material is not classified as hazardous according to criteria of Safe Work Australia.

Avoid contact with skin and eyes. Avoid breathing dust, fume, gas, mist, vapour or spray. Wear overalls, safety shoes, impervious gloves and safety glasses. Use only in well ventilated areas. Wash hands after use. Keep containers closed when not in use.
