## 2. HAZARDS IDENTIFICATION

### CLASSIFIED AS HAZARDOUS ACCORDING TO ASCC CRITERIA

**RISK PHRASES**
- R43 May cause sensitisation by skin contact.
- R50/53 Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

**SAFETY PHRASES**
- S2 Keep out of reach of children.
- S24 Avoid contact with skin.
- S37 Wear suitable gloves.
- S60 This material and its container must be disposed of as hazardous waste.
- S61 Avoid release to the environment. Refer to special instructions / safety data sheets.

### NOT CLASSIFIED AS A DANGEROUS GOOD BY THE CRITERIA OF THE ADG CODE

4. FIRST AID MEASURES

Eye
If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes.

Inhalation
If inhaled, remove from contaminated area. To protect rescuer, use a Type A (Organic vapour) respirator or Air-line respirator (in poorly ventilated areas). Apply artificial respiration if not breathing.

Skin
If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. Continue flushing with water until advised to stop by the Poisons Information Centre or a doctor.

Ingestion
For advice, contact a Poisons Information Centre on 13 11 26 (Australia Wide) or a doctor (at once). If swallowed, do not induce vomiting.

Advice to Doctor
Treat symptomatically

5. FIRE FIGHTING MEASURES

Flammability
Combustible. May evolve toxic gases (carbon oxides, hydrocarbons) when heated to decomposition.

Fire and Explosion
Evacuate area and contact emergency services. Toxic gases may be evolved in a fire situation. Remain upwind and notify those downwind of hazard. Wear full protective equipment including Self Contained Breathing Apparatus (SCBA) when combating fire. Use waterfog to cool intact containers and nearby storage areas.

Extinguishing
Dry agent, carbon dioxide or foam. Prevent contamination of drains or waterways.

Hazchem Code
None Allocated

6. ACCIDENTAL RELEASE MEASURES

Spillage
If spilt/ containers damaged (bulk), use personal protective equipment. Contact emergency services where appropriate. Clear area of all unprotected personnel. Eliminate all ignition sources. Ventilate area where possible. Contain spillage, then cover/ absorb spill with non-combustible absorbant material (vermiculite, sand, or similar), collect and place in suitable containers for disposal.

7. STORAGE AND HANDLING

Storage
Store out of direct sunlight and out of the reach of children, in a cool, dry, well ventilated area, removed from oxidising agents (eg. hypochlorites), acids (sulphuric acid), heat sources and foodstuffs. Ensure containers are adequately labelled, protected from physical damage and sealed when not in use. Large storage areas should have appropriate ventilation systems.

Handling
Before use carefully read the product label. Use of safe work practices are recommended to avoid eye or skin contact and inhalation. Observe good personal hygiene, including washing hands before eating. Prohibit eating, drinking and smoking in contaminated areas.

8. EXPOSURE CONTROLS/ PERSONAL PROTECTION

Exposure Stds
No exposure standard(s) allocated.

Biological Limits
No biological limit allocated.

Engineering Controls
Avoid inhalation. Use in well ventilated areas. Where an inhalation risk exists, mechanical extraction ventilation is recommended.

PPE
Wear splash-proof goggles and PVA or viton (R) gloves. When using large quantities or where heavy contamination is likely, wear: coveralls. Where an inhalation risk exists, wear: a Type A (Organic vapour) respirator.

9. PHYSICAL AND CHEMICAL PROPERTIES
Product Name: OOMPH GLUE AND STAIN REMOVER

Appearance: CLEAR COLOURLESS LIQUID
Solubility (Water): INSOLUBLE
Odour: CITRUS ODOUR
Specific Gravity: 0.8369
pH: NOT AVAILABLE
% Volatiles: NOT AVAILABLE
Vapour Pressure: NOT AVAILABLE
Flammability: COMBUSTIBLE
Vapour Density: NOT AVAILABLE
Flash Point: NOT AVAILABLE
Boiling Point: NOT AVAILABLE
Upper Explosion Limit: NOT AVAILABLE
Melting Point: NOT AVAILABLE
Lower Explosion Limit: NOT AVAILABLE
Evaporation Rate: NOT AVAILABLE

10. STABILITY AND REACTIVITY

Chemical Stability: Stable under recommended conditions of storage.
Conditions to Avoid: Avoid heat, sparks, open flames and other ignition sources.
Material to Avoid: Incompatible with oxidising agents (eg. hypochlorites) and acids (eg. nitric acid).
Hazardous Decomposition Products: May evolve toxic gases (carbon oxides, hydrocarbons) when heated to decomposition.
Hazardous Reactions: Polymerization is not expected to occur.

11. TOXICOLOGICAL INFORMATION

Health Hazard Summary: Low to moderate toxicity. This product may only present a hazard with eye contact, prolonged and repeated skin contact and vapour or mist inhalation at high levels. Potential skin sensitiser. Due to the low vapour pressure of this product an inhalation hazard is not anticipated under normal conditions of use unless sprayed, heated or large volumes used in confined, poorly ventilated areas.

Eye: Irritant. Contact may result in irritation, lacrimation, pain, redness and conjunctivitis. May result in burns with prolonged contact.
Inhalation: Low irritant. Over exposure may result in irritation of the nose and throat, with coughing. High level exposure may result in dizziness, nausea and headache. Due to the low vapour pressure, an inhalation hazard is not anticipated with normal use.
Skin: Irritant. Contact may result in drying and defatting of the skin, rash and dermatitis. May cause sensitisation by skin contact.
Ingestion: Low to moderate toxicity. Ingestion may result in gastrointestinal irritation, nausea, vomiting, dizziness and drowsiness. Aspiration may result in chemical pneumonitis and pulmonary oedema.

Toxicity Data:
- D-LIMONENE (5989-27-5)
  - LD50 (Ingestion): 4400 mg/kg (rat)
  - LD50 (Intraperitoneal): 600 mg/kg (mouse)
  - LD50 (Intravenous): 110 mg/kg (rat)
  - LD50 (Skin): > 5 gm/kg (rabbit)
  - LD50 (Subcutaneous): 3170 mg/kg (mouse)
  - LDLo (Subcutaneous): 30200 mg/kg (rat)
  - TDLo (Ingestion): 67 g/kg/39 weeks intermittently (mouse)

12. ECOLOGICAL INFORMATION

Environment: If released to the atmosphere limonene is expected to rapidly under go oxidation reactions with hydroxyl radicals, ozone and nitrate radicals. If released to soil or water limonene is expected to rapidly volatilise from surface. Adsorption is also thought to be significant. Limonene appears to be resistant to biodegradation under aerobic conditions. May bioconcentrate in aquatic organisms.

13. DISPOSAL CONSIDERATIONS

Waste Disposal: For small amounts, absorb with sand, vermiculite or similar and dispose of to an approved landfill site. For larger amounts, contact the manufacturer for additional information. Prevent contamination of drains or waterways as aquatic life may be threatened and environmental damage may result.

Legislation: Dispose of in accordance with relevant local legislation.
NOT CLASSIFIED AS A DANGEROUS GOOD BY THE CRITERIA OF THE ADG CODE

15. REGULATORY INFORMATION

Poison Schedule: Classified as a Schedule 5 (S5) Poison using the criteria in the Standard for the Uniform Scheduling of Drugs and Poisons (SUSDP).

AICS: All chemicals listed on the Australian Inventory of Chemical Substances (AICS).

16. OTHER INFORMATION

Additional Information:

RESPIRATORS: In general the use of respirators should be limited and engineering controls employed to avoid exposure. If respiratory equipment must be worn ensure correct respirator selection and training is undertaken. Remember that some respirators may be extremely uncomfortable when used for long periods. The use of air powered or air supplied respirators should be considered where prolonged or repeated use is necessary.

EXPOSURE STANDARDS - TIME WEIGHTED AVERAGE (TWA) or WES (WORKPLACE EXPOSURE STANDARD) (NZ): Exposure standards are established on the premise of an 8 hour work period of normal intensity, under normal climatic conditions and where a 16 hour break between shifts exists to enable the body to eliminate absorbed contaminants. In the following circumstances, exposure standards must be reduced: strenuous work conditions; hot, humid climates; high altitude conditions; extended shifts (which increase the exposure period and shorten the period of recuperation).

ABBREVIATIONS:
ADB - Air-Dry Basis.
BEI - Biological Exposure Indice(s)
CAS# - Chemical Abstract Service number - used to uniquely identify chemical compounds.
CNS - Central Nervous System.
EINECS - European INventory of Existing Commercial chemical Substances.
IARC - International Agency for Research on Cancer.
M - moles per litre, a unit of concentration.
mg/m³ - Milligrams per cubic metre.
NOS - Not Otherwise Specified.
NTP - National Toxicology Program.
OSHA - Occupational Safety and Health Administration.
ph - relates to hydrogen ion concentration using a scale of 0 (high acidic) to 14 (highly alkaline).
ppm - Parts Per Million.
RTECS - Registry of Toxic Effects of Chemical Substances.
TWA/ES - Time Weighted Average or Exposure Standard.

HEALTH EFFECTS FROM EXPOSURE:
It should be noted that the effects from exposure to this product will depend on several factors including: frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a Chem Alert report which would encompass all possible scenarios, it is anticipated that users will assess the risks and apply control methods where appropriate.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES:
The recommendation for protective equipment contained within this Chem Alert report is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

COLOUR RATING SYSTEM: RMT has assigned all Chem Alert reports a colour rating of Green, Amber or Red for the sole purpose of providing users with a quick and easy means of determining the hazardous nature of a product. Safe handling recommendations are provided in all Chem Alert reports so as to clearly identify how users can control the hazards and thereby reduce the risk (or likelihood) of adverse effects. As a general guideline, a Green colour rating indicates a low hazard, an Amber colour rating indicates a moderate hazard and a Red colour rating indicates a high hazard.
Product Name  OOMPH GLUE AND STAIN REMOVER

While all due care has been taken by RMT in the preparation of the Colour Rating System, it is intended as a guide only and RMT does not provide any warranty in relation to the accuracy of the Colour Rating System. As far as is lawfully possible, RMT accepts no liability or responsibility whatsoever for the actions or omissions of any person in reliance on the Colour Rating System.

Report Status  This document has been compiled by RMT on behalf of the manufacturer of the product and serves as the manufacturer's Material Safety Data Sheet ('MSDS').

It is based on information concerning the product which has been provided to RMT by the manufacturer or obtained from third party sources and is believed to represent the current state of knowledge as to the appropriate safety and handling precautions for the product at the time of issue. Further clarification regarding any aspect of the product should be obtained directly from the manufacturer.

While RMT has taken all due care to include accurate and up-to-date information in this MSDS, it does not provide any warranty as to accuracy or completeness. As far as lawfully possible, RMT accepts no liability for any loss, injury or damage (including consequential loss) which may be suffered or incurred by any person as a consequence of their reliance on the information contained in this MSDS.
