## Moving Tip!

Ensure that medications, personal hygiene and grooming products are packed into a separate box or backpack. Collect other necessities like phone chargers, basic food and beverage items, and pet supplies, and pack into another clearly labelled box. Finally, things like remote controls, batteries, and bed and couch legs should also have their own carton put aside. Consider taking these with you rather than leaving in charge of a removalist. You'd hate for these essentials to go missing.
