

ONEGO™

Monier ONEGO™ is premixed all-in-one bedding mortar & flexible pointing system that was developed to simplify the process of ridge repair and replacement.

FEATURES:

- Fast same day installation
- No painting required
- Replaces sand/cement bedding mortar & pointing
- Water clean up
- Coverage: Approx 2-3 lineal metres per 10L pail

ONEGO™ COLOUR PALETTE

AVAILABLE IN 4 COLOURS*

CAN BE USED ON BOTH CONCRETE AND TERRACOTTA RIDGE/ROOF TILES.

Coloured oxides can be added to ONEGO™ 'Neutral' to match any roof tile colour.

See Monier's ONEGO VIDEO

monier.com.au

* Colours have been reproduced as faithfully as possible, however, actual colours may vary due to the printing process

HOW TO USE MONIER ONEGO™ ALL-IN-ONE AS A BEDDING MORTAR

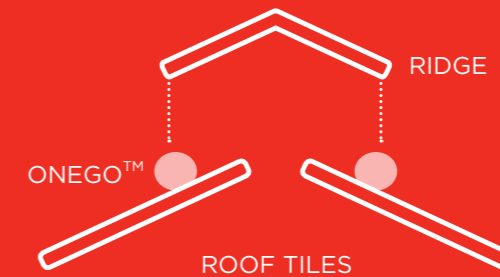

Mix to a firm consistency for bedding tiles where more strength in the material is required.

- STEP 1** Mix content.
- STEP 2** Trowel ONEGO™ onto the roof tiles.
- STEP 3** Locate the ridge tile onto the ONEGO™ bedding.

Using a trowel mix the product until a slightly wet consistency is achieved. DO NOT over work/mix.

Using a trowel place a 'sausage' shaped bed of ONEGO™ onto the surface of the roof tiles where the edges of the ridge will be laid.

Push the ridge tile firmly onto the ONEGO™ bedding material, ensuring it makes full contact.

HOW TO USE MONIER ONEGO™ AS A POINTING ADHESIVE

Mix to a smoother consistency for a smooth finish over the top of the bedding.

- STEP 4** Mix the product further to achieve a thinner consistency for pointing adhesive.
- STEP 5** Remove excess bedding material and apply pointing adhesive.

DO NOT over mix or the product will be too thin to be applied as a pointing adhesive and may sag.

Smooth off any excess pointing material, ensure the edge of the ridge tile is fully coated. You can mix ONEGO™ to a 'wetter' consistency to fill any gaps or air holes.
