

2017 RANGE & ACCESSORIES BROCHURE

Take This Brochure to the Special Orders Desk to place an order

Styliste' 6 (Item no: 3171534) with optional woodbox (Product Code: SCSTYW6).

As nature's original heat source and the world's first oven, fire still has the power to stir our most primal instincts, bringing people together to relax, engage and share our most intimate moments.

At Scandia, we know how to tame fire and we are experts in designing wood fires and stoves that thrive in Australian conditions. Our world class designs and commitment to quality are inspired by Scandinavian cultural values and the craftsmanship for which they are renowned. These same values resonate throughout our organisation, instilling a passion for designing great quality, affordable wood fires.

In the harsh winters of Scandinavia, fire is essential for survival and this is also true for many Australians who rely on fire as the primary source of heating. In Australia fire is also about socialising, about bringing the outdoors in and allowing us to get back to nature. It keeps the gathering going outside as night falls when the chill in the air would send us back indoors.

At Scandia, we believe in the power of fire to bring people together. We believe in the power of Scandia to bring quality design and Australians together.

PRECISION ENGINEERING

Scandia utilises CNC laser technology and robotics to manufacture products of impeccable quality, engineered to precise specification.

TRADITIONAL RANGE

With origins forged in Australian history, the classical styling and design of our traditional range represents the pinnacle in affordable, high quality wood heating.

- Minimum 10 year firebox warranty
- Crafted Japanese fireproof glass
- Firebrick lined fireboxes
- "Clearview" glass air wash system
- High temperature stove paint

HEAT & COOK

Whether it's wood fired pizza on the deck or the primary source of heating, cooking or hot water, this wood fired oven is as diverse as it is functional. Featuring cast iron doors and an extra large cooktop, the Heat & Cook is the perfect addition to any indoor or outdoor living space.

-  Heat up to 200m²
-  Large baker's oven
-  Optional hot water jacket
-  650w x 565d x 865h

Item no: 3170754

Heat & Cook is exempt from testing under AS/NZS 4012 and 4013

Item no: 3171288

WARMBRITE 140

Perfect for the cottage home, holiday house or man cave, the Warmbrite 140 is an affordable, radiant wood fire. The radiant construction method also means that the top panel of the firebox operates as a highly effective cooktop for soups, stews and pot roasts.

- Heat up to 140m²
- 5mm heavy duty firebox
- 500w x 450d x 735h

63%	1.5g/kg	15.6kW
Efficiency	Emissions	kW Rating

Item no: 3171489

WARMBRITE 200

This traditionally styled, medium sized, fan forced convection wood fire is engineered to effectively heat small to medium sized homes. The Warmbrite 200 is also ideal for environments where space is limited.

- Heat up to 200m²
- Maximised overnight burn times
- 3 speed electric fan
- 673w x 530d x 735h

67%	1.1g/kg	7.9kW
Efficiency	Emissions	kW Rating

Item no: 3171485

WARMBRITE 300

This traditionally styled, large format convection wood fire is perfect for use in large, open plan homes and commercial environments where ambience is paramount.

- Heat up to 300m²
- Maximised overnight burn times
- 3 speed electric fan
- 770w x 580d x 810h

62%	1.3g/kg	10.1kW
Efficiency	Emissions	kW Rating

For more information about the Scandia Warmbrite Range, scan the QR code to watch a short video or visit our website www.scandiatoves.com.au.

200 STACKER

This is a modern and practical adaptation of our most popular wood fire, the Warmbrite 200, with the addition of a handy wood storage pedestal designed to keep firewood dry and conveniently located.

-  Heat up to 200m²
-  Large wood storage
-  3 speed electric fan
-  673w x 530d x 865h

67%	1.1g/kg	7.9kW
Efficiency	Emissions	kW Rating

Item no: 3171483

300 STACKER

The Stacker 300 combines a large wood storage pedestal with the body of our classical Warmbrite 300 to create a practical and powerful wood fire combination perfect for large open plan spaces.

-  Heat up to 300m²
-  Large wood storage
-  3 speed electric fan
-  770w x 580d x 910h

62%	1.3g/kg	10.1kW
Efficiency	Emissions	kW Rating

Item no: 3171535

Item no: 3171219

SUPREMACY 200

This premium, mid size, slow combustion wood fire is engineered to deliver a unique combination of elegance, refinement, technology, sustainability and industry leading performance.

-  Heat up to 200m²
-  8mm heavy duty steel firebox
-  Soft touch fan control with infrared remote
-  655w x 575d x 725h

67%	1.1g/kg	10.2kW
Efficiency	Emissions	kW Rating

Item no: 3171224

SUPREMACY 300

The largest model in our premium range, the Supremacy 300 has presence in any room with its sleek lines and bay window design. This powerful, yet elegant unit is capable of heating large, open plan homes and commercial spaces.

-  Heat up to 300m²
-  8mm heavy duty steel firebox
-  Soft touch fan control with infrared remote
-  755w x 662d x 765h

69%	0.9g/kg	13.9kW
Efficiency	Emissions	kW Rating

- 1113w x 759h
- 795w x 503d x 604h

61%	0.9g/kg	9.5kW
Efficiency	Emissions	kW Rating

WHY CHOOSE AN INBUILT WOOD FIRE?

Everyone loves an open fire, but in reality they are inefficient, plagued by excessive fuel consumption and uncontrollable heat levels that send much of the energy produced straight up the chimney as carbon emissions. Scandia's Series 3 range of inbuilt wood fires are an ideal solution for home owners with existing open fires and who are seeking a cleaner, warmer, more sustainable wood fire. They are also ideal for the new home builder/renovator wanting the warmth, ambience and style of an inbuilt wood fire without the need for a masonry fireplace.

For more information about zero clearance, scan the QR code to watch a short video or visit our website www.scandiastoves.com.au.

*The Warmbrite inbuilt range is supplied with a mid mount fascia. The floor mount fascia option can be ordered separately at any Bunnings Special Orders desk.

CONTEMPORARY RANGE

Influenced by a passion for combining indoor and outdoor living and the unmistakable elegance and style of European design, the team at Scandia has created a visionary range of radiant and open wood fires perfect for the most inspired indoor/outdoor living spaces.

- Minimum 10 year firebox warranty
- Tested and approved to AS/NZS 4012/4013 and 2918 safety standards
- Heavy duty steel construction
- Firebox liners to maximise burn efficiency

HELIX GRAPHITE

A Scandinavian inspired design with elegant contours, subtle grey tones and concentric lines, the Helix Graphite is the perfect centrepiece for any contemporary home. This powerful radiant heater delivers the ambience and warmth you can get only from an Australian designed wood fire.

-  Heat up to 200m²
-  Practical wood storage
-  Extended overnight burn times
-  615w x 450d x 1160h

FIREWOOD STORAGE

The Scandia wood storage range represents quality, functionality and inspired design. This range of products has been developed with the same ethos we use when developing any product that we sell. It must be affordable, on the cutting edge of design, be robust and fit for purpose.

When it came to wood storage this simply meant that everything we produce has to look great, provide indoor and outdoor application and be strong enough to hold decent quantities of Australian hardwood...We think we've nailed it.

TECHNICAL INFORMATION

PROFESSIONAL INSTALLATION

It is a requirement that all Scandia solid fuel and gas appliances are fitted by a qualified, licensed installer whose work complies with local council regulations, Australian standards and manufacturer's specifications. Failure to correctly install is extremely dangerous, will void any warranty claims and may compromise any future insurance claims.

For a professional installation we recommend calling **1300 FIDDIT (1300 343 348)** or book online at www.fiddit.com.au

CLEAR SKIES, CLEAR CONSCIENCE

When you purchase a Scandia wood fire, you can be confident in the knowledge that you are purchasing the only sustainable and most affordable renewable source of home heating available.

As a supporter and sponsor of Landcare Australia, Scandia is mindful of any impact on the environment. Therefore, it's reassuring to us to know that 98 per cent of hardwood burnt in Australia is sustainably sourced, and by choosing to burn this firewood in a Scandia wood fire, you will generate no additional CO2 emissions than if that same wood were left to decompose naturally in the bush. (Kerryn Paul, 2003)

To control the amount of emissions released into the environment, Scandia designs all combustion wood fires with a two stage, primary and secondary air system. While the primary air controls the rate of burn, the secondary air system hyper-heats any excess carbon, converting the majority of residual emissions into energy which is then stored in the firebricks and firebox, improving overall efficiency of the heater and minimising any impact on the environment.

As an organisation, Scandia is committed to helping the environment through the promotion of renewable energy, sustainable harvesting practices and a commitment to programs that focus on reducing carbon emissions.

DISCLAIMER

Due to our policy of continuous improvement of our products and services, technical specifications and claims, correct at the time of going to print, may be subject to variation without prior notice. Scandia Heating (Aust) Pty Ltd has endeavoured to ensure that the information in this document is correct and fairly stated, but does not accept liability for any error or omission.

Scandia Heating (Aust) Pty Ltd accepts no liability whatsoever for their interpretation of AS/NZS 2918-2001, AS/NZS 4012-4013. All heating capacities quoted are based on units tested with quality hardwood. Minimal performance reduction may result due to large glassed areas, vaulted ceilings, draughts or insufficient insulation. We reserve the right to alter specifications without notice.
