^ These products are for use internally on flat glass. Do not install inside showers, on hot glass or under 10°C. Not to be used on double glazed windows or as automotive film.

† Do not apply where prohibited by law, check State Laws for the legality of this product in your area. Do not apply to front windscreens or over wire defrosters. Only apply to inside of windows (between 15-25°C) in a shaded area free from wind and dust.

See individual packs for detailed installation instructions

Tools Required for Installation

- Application Spray
- Lint-free Cloth
- Applicator
- Straight Edge
- Craft Knife
- Measuring Tape

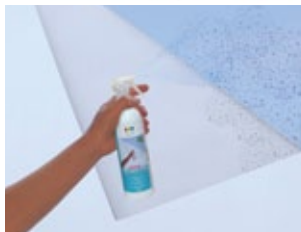

FILM ACCESSORIES

Installation Kit (WFIK)

Handy kit for installing window film, includes:

- Squeegee with built in Spray Bottle
- Low-Lint Cloth
- Tape Measure
- Craft Knife
- Temporary Hanging Tape

Application Solution Spray (WFSS)

Specifically formulated ammonia-free solution is designed to lubricate both window and film for easy application.

Spray assists with working out air bubbles and can be used on most types of film.

Felt Tip Applicator (WFAF)

Specially designed applicator with padded tip to prevent scratching. Ideal for installing Static Film and Automotive Tint.

Dual Side Applicator (WFAD)

Soft dual edge applicator with easy grip is ideal for applying window film in tight corners as well as large areas.

Squeegee Applicator (WFAQ)

Make cleaning windows easier with this wide, soft edge Squeegee.

Can also be used for applying window film over large areas.

*All values are based on film only and can vary +/- 5% depending on manufacturing environment and solar spectrum range used.
